

# CAH & Rural Hospital Hand Hygiene Business Case

## Common challenges:

- "I need higher quality HH data, people just check boxes"
- "I am constantly chasing people down! 'It is like herding cats'"
- "Our paper-based HH data collection is extremely time consuming"
- "I am more short staffed than ever, and have gaps in getting data"
- "I can't get quality and timely reports"

## Qualaris solutions:

- Audit visibility by department, by role, by individual
- Eliminate "herding cats" by assigning and tracking auditing goals
- Ease of use - saves time & thrive with less staff
- Easy on-boarding in less than 10 minutes
- Instant access to reports in multiple formats

## Customer Quotes:

*"Using Qualaris is a big time saver. You don't have to have piles of paper on your desk."*

*"Staff can go right to the audit on any device with internet access, it really is as simple as the paper and pen for auditing, but much faster for reporting."*

*"If we want 20 audits in a month from a unit, I can check to see how many they have done, and can drill down to see exactly who has done the audits. It is very helpful to have access to the data this way."*

## Customer Outcome:

Using Qualaris to automate audits and reporting, a community hospital had a 35% improvement in hand hygiene compliance. That means fewer infections, huge cost savings, and most importantly, safer patients.

## Start a free 30 day trial and realize the benefits:

- ✓ Save time & ease staff shortages
- ✓ Leverage staff time for better patient outcomes
- ✓ Increase regulatory compliance
