Customize to match your home's style.

SIMULATED DIVIDED LITES

AVAILABLE IN
7/8" AND 1-1/8"

GRILLES BETWEEN THE GLASS

AVAILABLE IN
23/32" AND 1"

Simulated Divided Lites

Our Simulated-Divided-Lite (SDL) bars are built with Ultrex® fiberglass. Permanently adhered in our factory to the outside surfaces of the glass, SDLs have a spacer bar between the panes of glass to offer the traditional look of divided lites.

Grilles Between the Glass

Located between the panes of insulating glass, Grilles-Between-the-Glass (GBG) combine easy cleaning with the timeless detail of a grille pattern.

Patterns

We offer various divided lite patterns so you can replicate the look of your original windows and doors — or add new architectural interest to your home.
