

## ABC eGate

Face it and walk your way into the future.

### Contactless Passenger Interaction

The **Automated Border Control eGate** processes travellers in a fast, intuitive and secure way, capable of addressing all exceptions in the self-service immigration flow.

It is a reliable unit where all core components, including the face capture unit, fingerprint scanner, travel document reader, display, door mechanisms and sensors are protected by metal vandal-proof encasings and panels.

## Flexibility and modularity

The ABC eGate flexible design supports multiple configurations, namely one-step or two-step workflow, with mantrap or single-door setup. The eGate customisation also enable the inclusion of optional modules, such as a fingerprint scanner.

## Integrated solution

The ABC eGate integrates with Orchestra platform taking advantage of its business process orchestration features, such as the business rules management, remote real-time monitoring with Inspector application, integration with external border management systems and watchlists, data security and privacy.

## High throughput

Designed and engineered to quickly process eligible travellers while maintaining and exceeding all international security standards. Optimises the document reading, biometric capture and matching processes, ensuring short transactions and high throughput.

## Seamless user experience

Devised for a truly seamless experience, the ABC eGate offers a smooth and continuously integrated traveller-centric flow, combining data from different systems for the highest level of security, and a modern experience for travellers, supported the best-in-class interface introducing an exceptional human factor with new personalized engagement based on state-of-the-art Artificial Intelligence and Virtual Reality technologies.
