

EES Totem

Entry/Exit System compliant biographic and biometric data acquisition for self-service pre-enrolment.

High-quality biometrics, reduced footprint and intuitive traveller guidance

The **EES Totem** is the biometrically enabled solution that allows travellers to perform the Entry/Exit System (EES) self-service pre-enrolment in a seamless, compliant and quick way.

Combining its reduced footprint with enhanced usability, the EES Totem is perfectly suited for the self-service processes of document reading, biometric captures and answering to the questions to complete the workflow.

The EES Totem assists the traveller during the whole process, performing numerous automatic adjustments and quality control checks. The result is the acquisition of biometric data in compliance with all the required standards, such as face capture Entry/Exit System requirements and NIST version 2.0 for fingerprint images.

Best quality for facial and fingerprints biometrics

EES Totem puts forward high-quality camera with automatic height adjustment, smart adaptive lighting and robust anti-spoofing for best-in-market image quality and matching.

Integrated solution

The totem integrates with Orchestra platform taking advantage of its business process orchestration features, such as the business rules management, remote real-time monitoring with Inspector application, integration with external border management systems and watchlists, data security and privacy.

Superior user experience

This unique traveller interaction model delivers fast proactive traveller-centric adjustments, the best-in-class interface and user friendly design.

Compact form factor

Given its reduced form factor, the Totem is ideal not only for large Airports but also for small terminals, land and maritime border crossing points.
