

Work from Home Security Bundle

AI Powered Remote Worker Protection

At Forum Info-Tech, we are committed to making cybersecurity accessible to our clients by delivering cyber security-as-a-service. Changes in the workforce are driving many organizations worldwide to adopt a work-from-home policy rapidly.

The two top threats that SMBs and Law Firms face in today's cyber-landscape are Business Email Compromise (BEC) and Ransomware. The FIT "Work from Home Security Bundle" is explicitly designed to reduce the risk for companies with remote employees. Powered by Barracuda MSP (BMSP), each product is backed by the BMSP's 24/7/365 Security Operations Center, extensive technical and go-to-market support, and managed by Forum Info-Tech/LevelCloud.

FIT Endpoint Protection

FIT Endpoint Protection is an integrated threat prevention solution that utilizes our own streaming-data analytics platform. The product combines the power of AI to block malware infections with additional security controls that safeguard against script-based, fileless, memory, and external device-based attacks and is backed by our Security Operations Center.

FIT Email Protection

FIT Email Protection is a cloud-based email security product that blocks spam and phishing attacks. Our solution catches malicious emails by utilizing computer vision, AI, and machine learning. Driven, curious, mobile, and growing smarter by the subject line, FIT Email Protection adds an important layer of protection to your inbox.

FIT Office 365 Security Monitoring

FIT Office 365 Monitoring is a managed security product that collects, aggregates, and normalizes log data from Office 365 tenants using FIT's analytics platform, SIEM, threat intelligence, and 24/7/365 Security Operations Center. Identify threat-like behavior in O365 like unauthorized access to cloud mailboxes, admin changes in the environment, impossible logins, mass file downloads, and brute force attacks.
