

Find out how secure your organization really is

Microsoft Security Workshop

Workshop highlights

-  Identify real threats to your cloud environment by doing Threat Check
-  Work with you to understand your security goals and objectives
-  Deliver the end-to-end Microsoft security story
-  Showcase security scenarios with hands-on activities
-  Develop joint plans and next steps

“Better security makes us a better business”

-Alain Quillet: Deputy CEO, Paule Ka

Do you know how many phishing attacks your organization has received? Whether your employees are using the right password protocol? Whether personal data is being exposed? In short, is your organization’s cloud environment as secure as you think it is?

Improve your security posture with a Microsoft Security Workshop

Organizations like yours are managing a growing volume of data and alerts, all while dealing with tight budgets and vulnerable legacy systems. In this environment, minimizing security risks is a massive challenge. Help achieve your broader security objectives—and identify current and real threats—by scheduling a Microsoft Security Workshop.

Designed for today’s security stakeholders, the workshop will help you develop a strategic plan based on the recommendations of Microsoft cybersecurity experts, customized specifically for your organizational needs. You’ll not only gain visibility into immediate threats across email, identity, and data; you’ll get valuable clarity and support on how to upgrade your security posture for the long term.

Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it’s essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current, ongoing risks to your cloud environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security strategy for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest tools

What to expect: Threat Check and more

During this one-day workshop at your site, we'll partner with you to strengthen your organization's approach to cybersecurity. It starts by helping you better understand how to prioritize and mitigate potential attacks.

How it works: we recommend to start two to three weeks prior to the workshop with Microsoft experts activating the Threat Check solution to run on top of your existing cloud infrastructure. On the day of the workshop, we'll walk you through a comprehensive Threat Check Results report featuring deep analysis of real cyberattack threats we've found currently targeting your organization in three critical areas: identity, email, and data.

These may include:

- Malware (including cloud-based and advanced zero-day malware)
- Phishing emails
- Compromised user accounts
- Malicious OAuth apps
- Suspicious user activities (risky sign-ins, etc.)

In addition to the Threat Check report, you'll get:

- A list of actionable recommendations to help immediately mitigate the identified threats
- A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity pros
- An inside look at Microsoft's holistic approach to security, and how it relates to your organization
- A hands-on opportunity to experience what integrated security looks like, including the latest tools and methods
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps

Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer
- IT Security
- IT Compliance
- Data Governance
- IT Operations

Why BUI?

When it comes to compliance, you need an experienced partner.

BUI is an award-winning IT consultancy and Microsoft Partner delivering Microsoft solutions with a focus on security, specialised cloud services, and data-centre support to mid-market and enterprise-level customers.

Through expert consulting, BUI enables customers to make the journey to the cloud through the innovative use of technology. For the last 20 years BUI has proven its capabilities in projects with various enterprise and mid-market customers.
