One Window, One World

Tour across the Botanical Garden, or ripple along the Corridor, or nestle at the Pavilion. Trade sceneries with moving steps, though latticed window is everywhere. Wall is the boundary and Window is the eye. With Vacant pane, its delicate pattern, enabling the space a taste of vividness. Outside the window, its looming scenery, leaving the surrounding a feeling of fantasy. Stand in front of the window, memorizing the pleased and peaceful life during the golden age. In the morning of spring, sightsee peach blossom falling. In the night of autumn, hear bamboo rain murmuring. Look back to see the sun fall. The panes print faintly onto the emerald bricks, lingering in people like the trace of age.

Look in details to see the elegance

Walk along the riverside to enjoy the beauty. The breeze blow, the wood murmur, the river ripple. Suddenly, the ripple transforms rapidly, reflecting thousands of crystalline lights! Under the sun, water is emerald just like the sky and the sky is crystal clear just like the water. Under the moon, the image of the moon reflected in the river looks like the silver plates rotating and dancing. Through capturing the splendid forms and dynamics, they become delicate and vivid grains and patterns. No need for rough sea or blustery wind to shock the world. Just need inch by inch treatment like the tiny wave to conceal the truth. From ancient to now on, this beauty of delicacy and subtleness can always become the stream, passing to generation of generation of its gracefulness and lingering charm.
