- Stay compliant

How is WorkWell Different?

1. Turn-key Managed Services Model

Our job is to take care of your employees' musculoskeletal health, and focus on the day-to-day details of preventing and treating injuries using experts in their field. This helps you focus on broader challenges of creating a positive safety culture and the promotion of safe, professional work practices and conditions that are in compliance with environmental policies and regulations.

2. Nationwide Credentialed Provider Network

For over 20 years, WorkWell has trained more than 10,000 highly educated credentialed PT providers on our industry-leading workplace methodologies and on how to deliver the highest quality workplace services possible.

3. Prevention AND Treatment

Only credentialed PTs can create and implement injury treatment plans.

4. Industry Standard Evidence-Based Programs

WorkWell uses a data model, field tested for 5 years with 70,000 visits. We know what it takes to have a successful program in your industry.

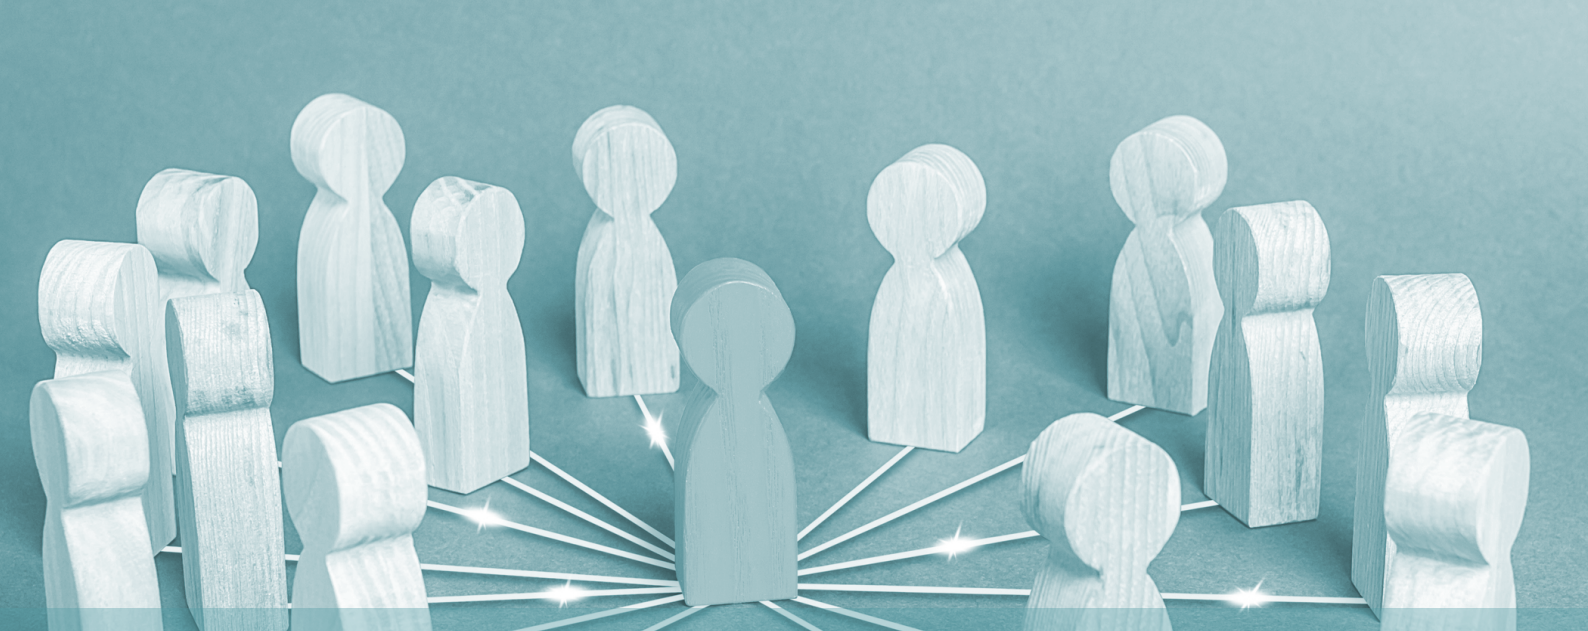

5. Proven Results

Thousands of our clients have experienced significant reductions in injuries, absenteeism, presenteeism, and costs.

6. Proactive Employee Engagement

Onsite PTs proactively engage with employees creating trust, loyalty, and increased employee retention.

Finding a New Way Forward — Together

Organizations are working hard to manage risks today while also looking toward what's next. You're tasked with managing the day-to-day, while taking on a broader role of creating a world-class safety culture.

To get it all done, you need a partner you can rely on.

Our expert resources — along with our analysis, processes, services, and support— provide expert guidance on how to manage and operate a hire-to-retire musculoskeletal wellness program that enhances your safety culture. Our approach can be adjusted and scaled to fit any situation, so you can respond to new demands, lower costs and create a healthier and safer workplace.

Why Choose MSK Managed Services?

Rising musculoskeletal injuries. Reduced productivity. Increasing costs. Complex compliance regulations. At WorkWell, we understand nothing is more important than safe work under any circumstance. We can help.

Inspired by the power of people who care, we work together with clients to prevent and treat sprains, strains, and back pain. While other MSK program providers rely on regional clinics to treat employees, WorkWell offers a comprehensive managed onsite approach that prevents and treats employees by combining pre-employment screening, onsite clinical support, proven and proactive preventative programs, and individualized treatment plans to deliver real results.

Our customized MSK wellness solutions use credentialed physical therapists to help you reclaim productivity, control costs, and mitigate risk so you can focus on what matters most – providing a safe working environment.

AmeriGas

Return to Work Services and Management

Help Employees Safely Transition Back to Work

- Return-to-work planning
- Return-to-work testing
- Alignment of employees and supervisors
- A team approach to modify work or set expectations for light duty
- Open communication channels

The Best Place to Start?

The first question is whether the numbers work. Our field-tested data model can help (5 years, 70,000 visits). You'll also receive candid answers from us about what will work and what won't.

The second question may surprise you. Will a warm and friendly program help attract or keep employees? WorkWell offers a fresh, personal approach for everyone – from boomers to millennials.

**"The Onsite
Managed Clinic
program developed
trust with our
employees.
The program
requires almost
no maintenance,
it practically runs
itself."**
