

How Time Collection Boosts Efficiency in

Your District: In a recent post by our partners at Frontline, they covered the important role that time collection hardware plays in a well-oiled time and attendance system.

That hardware must embody three core pillars in order to be as accurate as possible: Seamless for Admins, Easy for Employees, Simple for IT.

Seamless for Admins

District admins are having new right. One of the latest hardships that employees are being paid data to be clear, concise, not to mention securely

Simple for IT

After speaking with from districts across the that IT is often very Technology departments constantly shrinking time boundaries.

They are also among some receive budget cuts and have them. Toss in issues spawned by remote learning and we're talking

Plug and play systems that are easy to research, implementation, and reduce support tickets overall.

Moreover, remote support on our behalf means that you don't have to leave your desk to get help. We proactively seek out potential issues to keep employees clocking in correctly - and keep unnecessary tickets out of your hair.

Easy for Employees

Traditional time tracking can be frustrating and tedious. They must spend time that they aren't being paid for just to write down and submit their time.

Your time collection hardware must be **seamless** for Admins, **easy** for Employees, and **simple** for IT.

challenges thrown at them left and they're faced with is ensuring correctly. Admins need their and easy to access - and stored.
