

Laserfiche and Accela Civic Platform Connector

This Velosimo off the shelf connector is explicitly built to the government use cases involving the Accela Civic Platform and Laserfiche's concurrent use. The easy, no-code administrative interface provides quick setup and updates to field mappings and other settings and deep insight into all interactive transactions between the two products.

SPECIFIC AND EASY

Off the shelf connectors built to specific government use cases and systems interoperability. Simple and easy no-code setup and maintenance designed for business users.

TRUST AND PEACE OF MIND

Predictable and foolproof interoperability, smart recovery from connected systems outages, and bulletproof through future systems upgrades.

DELIGHTED CUSTOMERS

Deliver a connected and uninterrupted experience for your staff and citizens, and avoid staff frustrations and errors of double data entry and reconciliation. And gain insight into systems outages and recovery.

LOWERED COSTS

Avoid costly legacy system replacement by connecting modern extensions, eliminate redundant systems and extend use of enterprise agreements, and avoid costly double data entry mistakes and corrections.

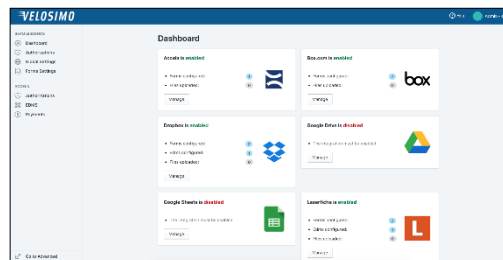

INCREASED AGILITY

Quickly and easily connect new solutions as you respond to emerging service demands.

Connector Features

- Agency staff and citizens using the Accela Civic Platform, Accela Citizen Access, or any of the Accela Mobile Apps, go about their typical use cases while their documents are automatically placed and retrieved from Laserfiche.
- Agency staff using Laserfiche can search and retrieve documents originating from the Civic Platform, using agency-specific meta-data criteria.
- Agency staff can bulk load documents into the Civic Platform with high-speed scanners to Laserfiche, with automated Civic Platform record association and metadata population.
- Advanced version provides the ability to migrate Civic Platform documents from ADS to Laserfiche while retaining associations.
- Metadata mapping from the Civic Platform fields to Laserfiche templates and fields.
- Auto data update of Laserfiche metadata when changed in the Civic Platform.
- Includes ongoing support for future versions of Laserfiche and the Civic Platform.
- Supports connected products, on-premise, cloud, and hybrid.

Centralized Insight and Automation

- Simple and easy control over all your connections in one place.
- Deep insight into all your connected systems transactions and performance.
- Automated actions between connected system.
- Support for unlimited systems integrations built by our partners or your own staff using our low-code controls.
