

Archer discovers the right deals in the right markets at the right time.

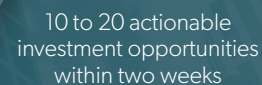

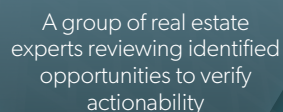

Archer is a real estate investment firm that enables investors to build their ideal portfolios in their target markets.

Archer's team consists of fintech entrepreneurs, real estate leaders, and experts in property acquisitions, capital markets, and data analytics.

Actionable Insights Model (AIM) is a proprietary technology platform that combines traditional and non-traditional data sources with local market expertise. Developed by Archer's skilled team of data scientists, AIM gives acquisitions teams and investment strategists valuable market intelligence so they can deploy capital efficiently and effectively.

Investors and owner operators rely on Archer's acquisitions team to pursue co-investment opportunities. Archer acts as the sponsor or co-sponsor and provides 1% to 10% of total equity contributions.

Technology that is the equivalent of an army of analysts pouring over data 24/7 to identify potential off-market opportunities

- Institutional investors
- Endowments
- Foundations
- Pension Funds
- Real Estate Investment Companies
- Family Offices
- RIAs
- Wealth Managers
