

WFP Income Fund Announces a 7.38% Net Annualized Return through 2nd Quarter 2016

July 1, 2016, Los Angeles, California - The WFP Income Fund, managed by Wilshire Finance Partners, paid investors a 7.38% net annualized non-compounded return through the second quarter of 2016. The net annualized compounded return through the second quarter of 2016 was 7.50%. The net annualized compounded return for the fund since its inception on September 23, 2013 through June 30, 2016 was 8.65%.

The WFP Income Fund is a short term alternative fixed income investment that seeks to protect the investor's principal while also providing attractive risk-adjusted returns primarily through investments in loans secured by first trust deeds and mortgages within the United States.

The return obtained by the fund was on an unlevered basis and was primarily the result of interest income received on the first trust deeds and mortgages in the fund's portfolio.

At the end of the second quarter of 2016, the portfolio had a weighted average loan-to-value of approximately 59.57%, a weighted average maturity of approximately 25 months, and 0% non-performing assets. The fund had an average loan size of approximately \$945,959, consisting of loans secured by residential, office, retail, light industrial and warehouse properties located predominantly in the State of California.

Through June 30, 2016 all loans in the fund were performing, however, management identified one loan it has classified as special mention. A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or in the fund's credit position at some future date. Special mention loans are not adversely classified and do not expose the fund sufficient risk to warrant adverse classification.

Year-to-date 2016 the fund experienced approximately \$14 million in loan repayments. Those repayments have created excess liquidity for the fund and resulted in a cash drag (or under-deployment) which has impacted the fund's returns.

Since the fund's inception in September 2013 through June 30, 2016, the net asset value (NAV) of the WFP Income Fund remained stable and demonstrated no correlation to the stock markets or bond markets. Further, the NAV was not sensitive to changes in interest rates.

"Continued uncertainty in various regions throughout the world has sparked a renewed interest in safe haven investments and asset quality. Though yields in the fund have dipped as a result of periodic under-

deployment, Wilshire continues to maintain our core philosophy of striving to protect our investors' principal while generating strong risk-adjusted returns," said Don Pelgrim, CEO of Wilshire Finance Partners. "The WFP Income Fund continues to be non-correlated to the stock and bond markets and demonstrates little sensitivity to interest rates. As a result, we believe that the fund provides investors with an alternative investment that may act as a hedge against near term volatility."

The WFP Income Fund has been approved for both retirement and non-retirement accounts on the following alternative investment platforms:

- Fidelity Investments (National Financial Services or NFS); CUSIP Number 94699K534
- TD Ameritrade as WFP INCOME FUND LLC NSA; CUSIP Number 93099B102
