SS8®

COLLECT. MONITOR. ANALYZE. VISUALIZE.

Actionable Intelligence for a Safe, Secure and Connected World

SS8 Networks provides the fastest and simplest way to collect, monitor, analyze, and visualize lawful interception data. For more than 20 years, we have been evolving and innovating to match the changing needs of Communications Service Providers (CSPs) and Law Enforcement Agencies (LEAs), while delivering comprehensive solutions that are easy to use and optimized for the best results.

Our solutions make analyzing, enriching and managing complex data sets simple, helping LEAs stop organized crime, catch criminals, and prevent terror attacks. For CSPs, we provide a trusted foundation for meeting regulatory requirements efficiently and effectively.

A COMPREHENSIVE APPROACH TO LAWFUL INTERCEPTION
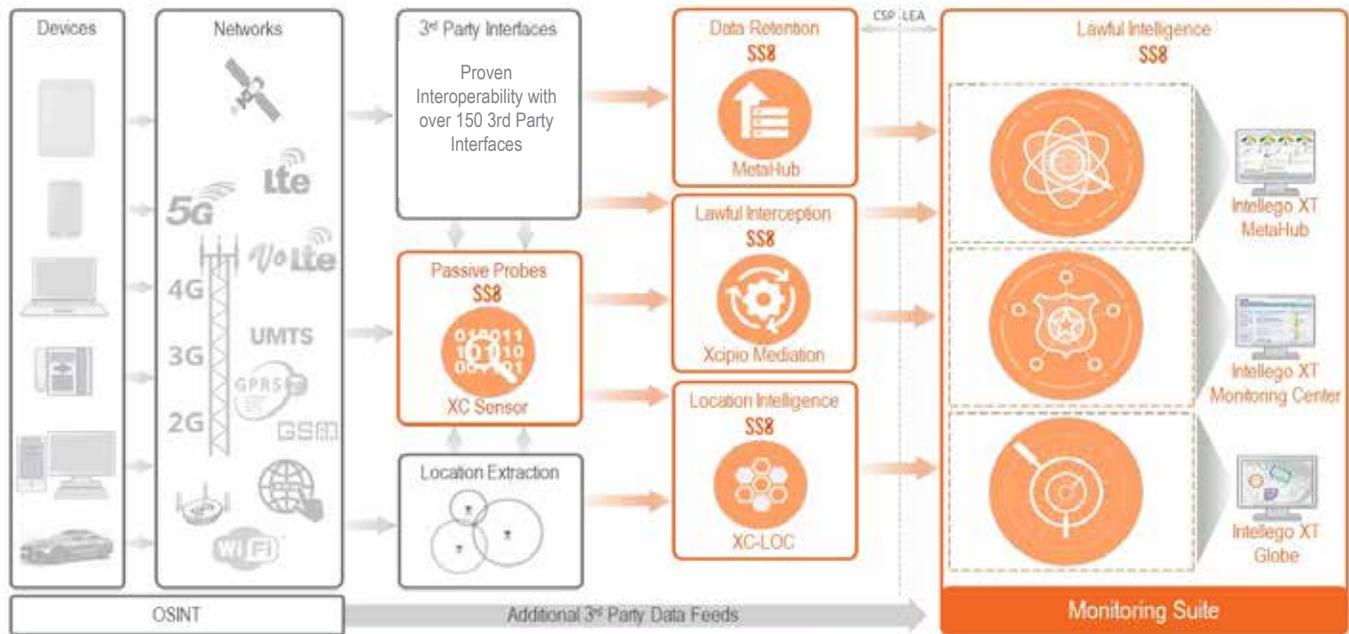

FEATURES:

Actionable Intelligence Through 'Data Fusion'
We blend gold standard Lawful Intercept data with 3rd party data sources (e.g. chat, social media, location, license plate scanners and others) to create a comprehensive 'digital fingerprint'. Minimizing the impact of encryption challenges, and improving investigation results.

Purpose-Built Solutions Designed for Analysts
We deliver workflow-driven solutions purpose-built for LEA analysts. Our data ingest and analysis platform offers powerful cross-data query tools to discover links between targets regarding communications data, location, time and other data points.

Real-Time Visualization Through Location-Based Intelligence
We support data visualization based on geo-fence technology, enabling users to understand the location and movement of criminals in relation to each other and provides better situational awareness.

Real-Time Mediation with Record Summarization
We enable extremely accurate data filtering and summarization reports to simplify data management. Packet header reports succinctly provide pertinent information to the intelligence agencies for rapid review.

Cloud-Ready Lawful Intercept
Our cloud-native solutions can be deployed in private, public and hybrid environments. They provide Lawful Interception for the next generation of communication services, in the core, in the cloud or at the network edge.
