Is NxGen Right for Me?

Is NxGen Right for Me?

Are you ready to step into the future?

Customs automation is right at your fingertips!

Reduce Errors, Increase Compliance

NxGen automates the entire process for you. When it's data in and data out, there's a minimal chance for errors to happen. NxGen lowers the potential for common errors and increases accuracy.

Not only does it lower the amount of errors, but NxGen also improves overall compliance. Knowledgeable people built the guard rails right from the start, guaranteeing everything is right the first time, error-free and fully compliant.

Save Time and Money

NxGen reduces your time to file and increases your entry speed. This automated process reduces the time per entry to under a minute! Typically, one person can do 40-50 transactions per day. NxGen will boost your productivity and enable you to complete double—even triple—the transactions per day. This means that more work will be done right the first time with fewer people, allowing you to focus on what's vital to your business.

Saving time is important, and time is money. NxGen will lower your costs and allow you to have more competitive bidding. When you automate your work with NxGen, you will save time and money. By passing your savings on to your customers, you will win business and beat out the competition.

its
Simplify Your Logistics

Checklist
Does your freight logistics system have the following?

☑ Powerful ACE capabilities that are **easy** to use & **simple** to deploy

☑ Fully Integrated Container Tracking

☑ **Customizable** Workflow Automation Management Capabilities

☑ The ability to **create** customer facing portals for transparency and to **centralize** communications, documents, reports, dashboard, key metrics and container tracking for you and your customers

☑ **Complete integration** with the Cargo Manifest Query into the file itself which eliminates redundant data entry

☑ Integrated auditing of the files and exception reporting to **increase compliance** and speed of processing

☑ End-to-end **world class** modular cloud-based system that **unifies** all shipments on one platform, making your logistics document flow **seamlessly**, anytime and anywhere

☑ The capability of being accessed using a computer and web URL

☑ All modules, all covered, from Brokerage, Import/NVOCC, Export, Air Export, Ocean AMS, Air AMS, world class Accounting, WO and Trucking (Coming Fall 2021!)

☑ The means to **seamlessly integrate** all the capabilities you need to...

Delight your customers and allow your people to thrive to be HEROES!
