

DATA PRIVACY. REIMAGINED.

APIgator by eXate is a scalable and efficient way to protect data flowing through APIs. By applying the Principle of Least Privilege (PoLP), APIgator has been designed to protect sensitive data and ensure only the correct, relevant information is provided to the right people.

The eXate Advantage

-  The eXate solution has been built to consistently and repeatedly protecting data
-  Enforced data policies for privacy & compliance via a single source of rules
-  Aggregate and orchestrate multiple Privacy Enhancing Technologies (PETs)

APIgator Capabilities

- Applying internal policies on the data that is shared internally and with third parties**
- Full audit capabilities on who is accessing data and who is blocked from accessing data**
- Integrated and protected at a proxy level, allowing you to protect multiple APIs.**

About eXate

We design, develop and support data privacy platform - empowering business to unlock the true value of their data, allowing sharing of data assets, safely and compliantly.
