KENSON PLASTICS' CENTER OF EXCELLENCE

THE KENSON TEAM FURTHERS ITS FOCUS ON EXCELLENCE THROUGH ITS LEADERSHIP, BEST PRACTICES, CUSTOMER SUPPORT, AND TRAINING PLATFORMS.

The commitment to defining and maintaining a culture of excellence is a long-term endeavor that the Top Leadership of Kenson Plastics Inc. is dedicated to upholding.

As part of this commitment, the company continues to satisfy the requirements of their ISO9001:2015 / AS9100D certification as was evident during the most recent surveillance audit conducted by Perry Johnson Registrars.

A surveillance audit is a tool where the certification body verifies that the organization's quality management system (QMS) is operational and effective and that continual improvements are being achieved. The auditor focuses on components necessary to properly manage and document a QMS such as the collection of data, documented information, records, and processes.

CAPACITY STRATEGY

Kenson Plastics Inc. is defined by its ever-evolving processes, capabilities, and high-skilled talent. From the simplest of designs and tooling to the most complex assemblies,

Kenson can help realize a customer's vision. Kenson Plastics maintains a strong and varied customer portfolio which includes aerospace, mass transit, medical devices, self-service kiosks, heavy equipment, and general electronics.

As part of its dedication to ensuring quick responses to customer needs, Kenson ownership has added additional capacity in the means of equipment, technology, and warehousing to accommodate the ebb and flow of the markets that it services.

If you would like to learn more about the capabilities of Kenson Plastics and how you can be a part of our success story please contact us at: (724) 776-6820 or visit our website kensonplastics.com.

During the recent June 2020 surveillance audit, Kenson satisfied all sampling and testing of its QMS with no findings for corrective action.

As part of this continued focus on excellence, the Kenson team also launched a new training platform. The fully customizable, cloud-based software supports the already well established Kenson training program with a new eLearning environment. In addition to traditional training modules, videos, presentations, etc. this new platform provides real time access to the Kenson community for quality alerts and other rich communication tools such as personal messages, calendar prompts, and discussion forums. While many eLearning promotions isolate their intended audience, the Kenson team uses this new tool to fully engage and empower their employees.

Kenson Top Leadership embraces that achieving the ISO9001:2015 / AS9100 certification is merely the starting point of this business' life-long project and incorporates the QMS tools throughout its processes to fully support its valued stakeholders – customers, employees, vendors, partners, and community.

KENSON PLASTICS INC. COVID-19 RISK MANAGEMENT AND PREPAREDNESS PLAN:

Kenson Top Leadership instituted their procedures [REF: KPP-6.3-1 Business Continuity and Disaster Recovery Contingency Plan and KSF-6.4-30-1 Pandemic Policy] as part of their response to the COVID-19 pandemic. Naturally many changes have been engaged which reflect the evolving times and safety precautions throughout our communities. Kenson is dedicated to ensuring a safe, healthy, and productive work environment for its employees and in doing so has implemented a no visitor policy. Only essential entities such as third-party cleaning and vending services are permitted on site and along with every employee, these individuals are also subject to daily temperature monitoring. Increased cleaning and sanitizing efforts have been applied as well. Social distancing is carried out which include work stations, lunch / break rooms, and the elimination of meetings in group settings where such precautions cannot be managed. Following Pennsylvania and WHO guidelines, all individuals who access the Kenson facility must wear masks, are expected to wash their hands, and must follow the social distancing protocols in place.
