On the **Billing Structure** page, set your Usage Limit and then click the **“Subscribe”** button

The screenshot shows the OneID dashboard interface. On the left is a navigation sidebar with categories like Home, Orders, Products, Customers, Analytics, Marketing, Discounts, Apps, SALES CHANNELS, and Online Store. The main content area is titled 'Welcome to the OneID Dashboard'. A prominent light blue notification box at the top contains the text 'Complete installation' and 'OneID widget is not yet installed. Please click the button below to complete installation.' Below this text is an 'Install' button with a right-pointing arrow, which is highlighted by a larger blue arrow pointing from the left. Below the notification are two status rows: one with a checkmark indicating the widget is enabled but needs installation, and another with a dot indicating it is not installed. A progress bar shows 'Age checks remaining for today' at 0 / 5. At the bottom is a line chart titled 'Age checks performed in the last 30 days' with a legend for 'Age Checked' and a grid showing zero activity.

On the Company Information page, provide all requested information, agree to the **Terms & Conditions** by ticking the checkbox and click **“Save”**.

The screenshot displays the OneID Dashboard interface. On the left, a navigation sidebar includes links for Home, Orders, Products, Customers, Analytics, Marketing, Discounts, Apps, Sales Channels, and Online Store. The main content area is titled 'Welcome to the OneID Dashboard' and features a prominent notification box with the heading 'Complete installation'. This box contains the text 'OneID widget is not yet installed. Please click the button below to complete installation.' and an 'Install' button, which is pointed to by a blue arrow. Below the notification, there are two status indicators: one showing 'OneID widget is enabled but require installation.' and another showing 'OneID widget is not installed, please complete installation.' Further down, a progress bar indicates 'Age checks remaining for today' at 0/5. At the bottom, a chart titled 'Age checks performed in the last 30 days' shows a flat line at 0.0 on a grid with a y-axis from -1.0 to 1.0 and an x-axis of dates from 16/09/2021 to 16/10/2021.

You will now be able to view the **OneID Dashboard**.

To complete the installation process, click on **“Install”**.

### Widget install method

**Cart snippet**  
This install method involves manually adding a snippet to the cart template.

[Use cart snippet](#)

**App Block**  
This method provides an App Block via a Theme App Extension which can be used to the frontend widget to be drag-and-dropped into the appropriate location on their cart page using the Online Store 2.0 theme customizer, if you have a supported theme.

[Use app block](#)

**JS API**  
This install method provides a generic JS API and allows merchants to integrate it into their theme themselves. This method is more suitable for themes which have an unconventional architecture or very complex cart/checkout processes.

[Use JS API](#)

Need help? [Contact us](#) or visit our [documentation](#).

Settings

This will take you to the **Widget Installation** page.

You have the option to **install the widget** in the shopping cart.

Click on “**Use Cart Snippet**” to install the app.

### Cart page install instructions

To finish installing open the templates/cart.liquid template.

Open templates/cart.liquid in the theme editor

Or, does your theme use sections?

Open sections/main-cart-footer.liquid in the theme editor

Find a suitable place in your theme where you want to use the widget and insert the following code exactly shown below:

```
<script id="oneid_widget_data_script" type="application/json">
  {
    liquid
      assign max = 0
      for item in cart.items
        for tag in item.product.tags
          if tag contains "ORBIT-OVER_"
            assign temp = tag | slice: 11,2 | plus:0
            if max < temp
              assign max = temp
            endif
          endif
        endfor
      endfor
    }
  }
  {verifyAge:({ max: {{ max }}}, container: "oneid_container", installMethod: "Cart Snippet")}
</script>
<div id="oneid_container"></div>
```

\*Buy it now\* or express checkout features should be disabled so that customer always has to go through the cart to checkout.

Done

Follow the **instructions** on the Cart Snippet page and press **“Done”**.

The Dashboard will now show the **message** “Your account is pending review”.

Immediately after installing the app there will be a **limit** on the number of age-checks you can perform daily, while your account is **under review**. Once the OneID team have **verified** your business this limit may be **increased or removed**.

The screenshot shows the Shopify Admin interface for the OneID app settings. The left sidebar contains navigation options: Home, Orders (22), Products, Customers, Analytics, Marketing, Discounts, Apps (highlighted), and SALES CHANNELS (Online Store). The main content area is titled 'Settings' and includes a breadcrumb 'Dashboard > Settings'. The 'OneID widget status' section shows 'OneID widget is enabled.' with a red 'Disable' button. The 'Subscription details' section shows the current plan with charges: '\$0.00 recurring application charge' and '\$0.35 per age verification check'. The 'Usage limit' section features a progress bar for 'Usage of this billing period' and an 'UPDATE USAGE LIMIT' input field set to '\$ 1000' with a 'Set new usage limit' button. A help link is visible at the bottom: 'Need help? Contact us or visit our documentation. Need help? Contact Us or visit our documentation.'

The **Apps** section of your Shopify store it will now show the OneID app as **enabled**.

This will also show any **usage limits** you have in place

From here you can also disable the widget.

To view the OneID widget simply add an **age restricted item** to your shopping basket and **view the basket** before checkout.

It is important to add **tags** to any age restricted products in your store. This will **initiate the OneID check** when someone tries to buy an age restricted item.

You can find **detailed instructions** on how to add tags to products at the **bottom of the Dashboard**.
