YOUR CENTRIFUGE EXPERTS

Vision Machine Inc. specializes in the manufacturing and repair of horizontal decanter centrifuges and has been doing so since 2004.

MANUFACTURING

From a Series 10 to Series 24 (10" up to 24" bowl diameter), Vision Machine manufactures a full line of decanter centrifuges and can adapt to virtually all types of processes and materials.

REPAIR & MAINTENANCE

Our horizontal centrifuge repair services are thorough, fast, and comprehensive. Every step of our operation brings years of valuable experience. Vision Machine repairs most make and models of centrifuges.

PARTS

We stock a variety of consumables and wear components for various manufacturers including, but not limited to, bearings, seals, gearbox components, and plows.

USED EQUIPMENT

We offer used centrifuges as-is, refurbished, or remanufactured and tested to OEMs specifications. We have a large inventory of used centrifuges available.

CONTROLS

Vision View allows you fully functioning remote access to your centrifuge and ancillary equipment. Vision View allows you to monitor and troubleshoot remotely via mobile access or computer.
