

PARAGONIX®

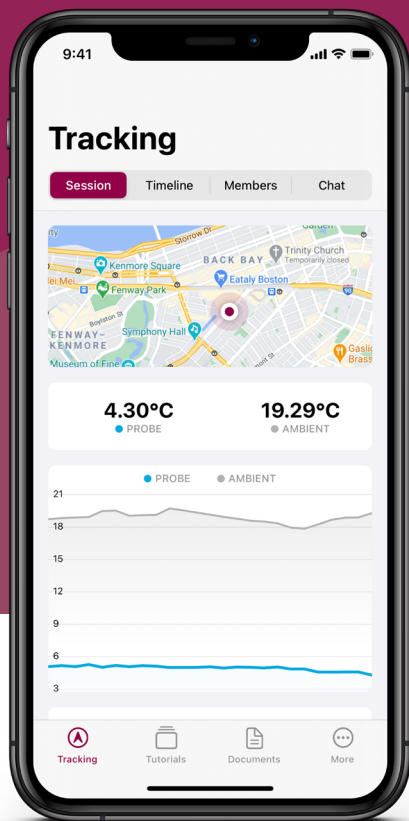

WHEN A LIFE IS ON THE LINE

Pairing the performance of Paragonix with real-time data to connect teams no matter where they are

paragonixtechnologies.com

Introducing the new Paragonix App

In the mission-critical world of transplantation, where there is no margin for error, Paragonix delivers the most advanced technologies to support transplant teams around the world every day.

PARAGONIX®

Real-time, centralized, secure coordination for transplant teams including pairing with the Paragonix organ transport systems to share organ status with the entire team.

Organ Status

Bluetooth pairing with all the Paragonix organ preservation systems enables team members in a session to track the organ conditions including both organ temperature and ambient temperature.

Location

GPS tracking of procurement team en route to and from the donor center.

Case Status

At-a-glance **graphic status trackers** provide a snapshot summary of timing of key events in the transplant case.

Communication

HIPAA compliant messaging and communications to keep the procurement team, OPO, donor hospital, and recipient team informed.

Flexibility to invite members from different hospital systems and organizations in a secure manner.
