FOR IMMEDIATE RELEASE: MARCH 5TH, 2019

**JOHN BROOKS COMPANY LIMITED
NAMED CANADIAN DISTRIBUTION CHANNEL FOR
Pneumatic Products Corporation (“PPC”), APV Industrial
Heat Exchangers and Dollinger & Plenty Filtration
PRODUCTS MANUFACTURED BY SPX FLOW**

Toronto, ON March 5, 2019 – Effective March 5, 2019, John Brooks Company will assume distribution rights across Canada for several SPX Flow brands including Pneumatic Products Corporation (“PPC”), APV Industrial Heat Exchangers and Dollinger & Plenty Filtration products. Additionally, several of the SPX Flow employees previously associated with these SPX Flow brands and product lines have joined the John Brooks organization. Their ongoing, active participation and involvement will provide for a smooth transition to John Brooks and a continuation of an excellent customer experience.

With an established record of accomplishment and a demonstrated commitment to its customers, as well as the addition of the previous SPX Flow personnel, John Brooks Company is well positioned to provide seamless delivery of Pneumatic Products Corporation (“PPC”), APV Industrial Heat Exchangers and Dollinger & Plenty Filtration products to the Canadian market

“This new partnership will leverage the previous SPX FLOW personnel and their outstanding market and application knowledge to support the business moving forward,” said Gord Bell, President of John Brooks Company Limited. “This arrangement will create greater customer value through a broader product offering, additional solutions and technical expertise relevant to the Canadian Industrial Manufacturing and Processing Sectors”,

About John Brooks Company Limited

Founded in 1938, and with offices across Canada, John Brooks Company Limited has been providing their customers with high quality, competitively priced products as well as technical design and engineering support services which consistently and continually meet their needs and deliver superior value. The Company’s commitment to continually refining their product offering based on the customers’ ever-changing needs has made them the supplier of choice to the Oil and Gas; Chemical; Food and Beverage; Pharmaceutical; Pollution Control; Steel; Pulp and Paper; Mining and Minerals; General Industrial and Municipal markets.
