

AgriQuip

AGRICULTURAL IMPLEMENT WHOLESALERS

Hydrasplitter

For larger tractors the Agriquip three point linkage mounted Hydrasplitter puts hydraulic power into use with unrivaled force. These splitters feature a simple, easy to use control valve with a convenient detent to return the ram quickly - ready for the next operation. The VTL can be used from a position sitting on the ground, to a point anywhere in the range of the tractors draft arm lit range, to suit any operator.

The super muscle machine, with the following features;

The control valve is simple and easy to use, with convenient detent feature for auto cylinder retract, allowing hands free to shift wood etc.

The large sized, heavy plate table means that wood after being split doesn't fall off easily.

The rugged construction means many years of trouble free use in commercial operation. A proven design of over 10 years in the market.

HydraSplitter VTL
