

HEAVY DUTY MECHANICS

MANY CERTIFICATIONS AVAILABLE

WORKING DAYS EXCEEDING 8 HOURS

TOWING CAPACITY UP TO 4,500 KG

EXPLOSION PROOF ELECTRIC VEHICLES

The **ALKE' ATX EX** are designed to avoid any ignition risk in the surrounding atmosphere during their normal use and are built using special, certified components. Design, prototyping

and manufacturing of all Alke' explosion-proof vehicles are carried out entirely in Italy, using the best of European and North American components in order to guarantee top quality and safety standards.

The ALKE' ATX EX

Electric Utility
Vehicles were
developed to
work in the hardest,
most demanding
conditions in chemical
and petrochemical
industries, production
sites of mineral oil and

natural gas, mining, tunnel construction and maintenance and many other sectors. They can be used for logistics, maintenance, first aid, firefighting, surveillance services, units with mobile cranes, etc.

DEALING
WITH
POTENTIALLY
HAZARDOUS
ENVIRONMENTS

SOLUTIONS FOR **EXPLOSION PROOF NEEDS**

Find out among our configurations the best solution for your needs!

We can develop special configurations upon request for specific applications or sectors like underground (ATEX M2) or environments where explosive materials are present (e.g. ammunitions and firework products - IP 4X and IP 5X).

> All the configurations presented are available for the vehicles with:

2-seat cab

4-seat cab

left-hand drive

DR1

Dropside body

Dropside body with mesh sides extension

BV1

Box van body with sliding doors

TA1

MF1

Tarpaulin body openable on three sides

TA2

Tarpaulin body with customised colours RS1

Rear seats kit

RS2

Rear seats kit with roof

AM1

Ambulance body

AM2

Ambulance body with roof

FL1

Flatbed

READY FOR THE MOST **DEMANDING CONDITIONS**

ALKE' electric utility vehicles are used daily by the most significant names in industry, in more than 40 countries across the globe.

ALKE' ATX EX

have been operating for years in critical areas such as the frozen lands of northern Europe or the extreme temperatures of the Sahara, or other remote locations in the Far East and Africa.

EXPLOSION PROOF APPLICATIONS

oil plants offshore extraction platforms natural gas plants chemical plants petrochemical industries tunnels mines among others

ATEX VEHICLE'S COMPONENTS FOR APPLICATIONS ON POTENTIAL HARZADOUS ENVIRONMENTS

TEMPERATURE MONITORING SYSTEM

In order to avoid risk of overheating, the surface temperature is checked by a specific sensors, according to the class and limit of the temperature requested as standard. If this occurs, the vehicle will automatically shutdown, lighting the related indicator.

An earth leakage check system (versions for Zones 1 and 21) automatically shuts the vehicle down if the maximum value should be exceeded, lighting the indicator on the dashboard panel.

An appropriate "Reset" pushbutton allows the vehicle to be moved out of the dangerous area in case of temperature and (versions for Zones 1 and 21 only) earth leakage sensor's alarms intervention.

ELECTRICAL EQUIPMENT AND SYSTEM

The electric wiring system has armoured cables for ducts subject to movement or without any mechanical protection.

Light blue wires are used for the connections of components with built-in protection, and their relative cable

glands (certified for their respective categories). The system is fitted with a 2-pole emergency battery cut-off switch.

BATTERIES AND CONNECTORS

The **ALKE'** ATXEX versions for Zones 1 and 21 has as vehicle battery type the Ex-e filling system.

Battery connectors are Ex-d type certified. On the versions for Zones 2 and 22 the batteries and relative connectors respect the EN 60079-15 standard.

NON ELECTRIC PARTS

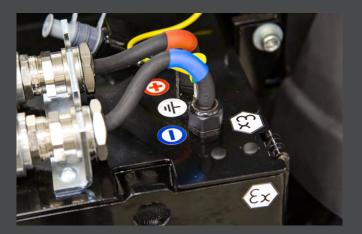

The disk or drum brakes are equipped with wear and temperature sensors to avoid the formation of sparks caused by the friction between metals, and to prevent friction overtemperatures from exceeding the value of the required temperature class and limit.

The seats of versions for Zones 1 and 21 are covered with an antistatic material and, where necessary, the external plastic surfaces are treated with electroconductive paint. All tyres are electro-conductive. Accessories, such as flashing beacon, reversing beeper, headlights, etc. are explosion-proof.

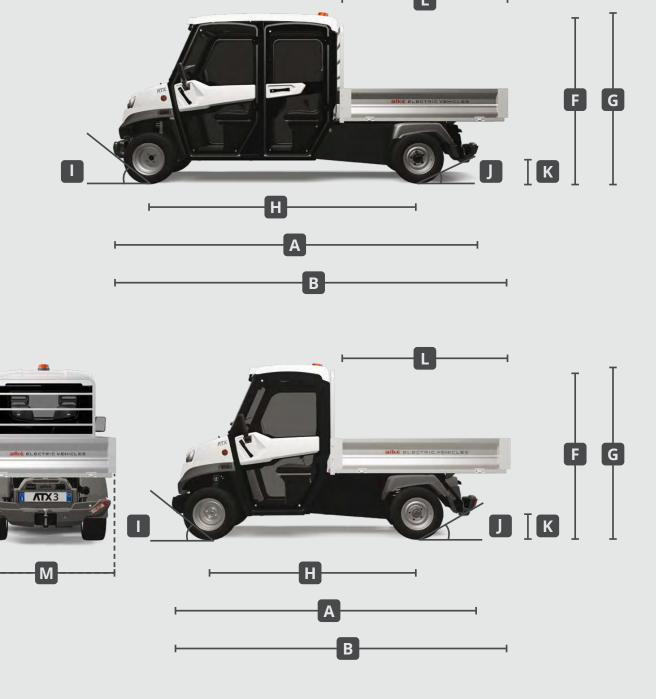

The **ALKE' ATX EX**

electric utility vehicles are available with 2 or 4 seats cab and a cargo bed with the possibility of customised variants upon request.

Note Top speed: approximate, obtained on a flat surface in optimum usage conditions and in SPORT mode. **Maximum negotiable slope:** approximate and assessed with vehicle empty in ideal usage conditions on discontinuous ramps. **Maximum autonomy:** the max autonomy value reported is indicative and refers to homologation data collected on WLTP cycle basis (combined circuit) with an configuration Alke' ATX vehicle with basic flatbed configuration. **Estimated battery lifespan:** approximate figure, based on the information in the manufacturer's possession at the time this file was published. **Maximum towing capacity:** calculated in optimum usage conditions, the trailers must have repulsion brakes and comply with the law. Maximum vertical weight on the tow hitch: 120kg. **The technical specifications indicated in this catalogue** (performance, autonomy, dimensions, etc.) depend - on temperature, terrain, driving style, accessories, load or use of the vehicle. The data usually refers to use on a flat surface in optimum usage conditions - i.e. a basic vehicle version with no load and with the lightest battery, on an even and paved road surface with an outdoor temperature of 25°C, the battery fully charged, on board electronic devices switched off, and without any other accessory consumption. **The technical specifications,** design and performance levels indicated in this technical data sheet are by way of example only and may be subject to modifications without prior notice.

With more than 25 years of experience and thousands of vehicles on the market, **ALKE'** is a key player in the electric road and industrial vehicle industry at an international level. Its products are positioned at the high end of the market in

terms of quality and performance and are now sold in more than 40 countries around the world covering all continents. Amongst its customers, **ALKE'** is proud to be able to include big names in the industry, important organisations and exclusive locations.
