

APPLICATION SECURITY POSTURE MANAGEMENT

Appsec360 is everything you need for continuous application security posture management

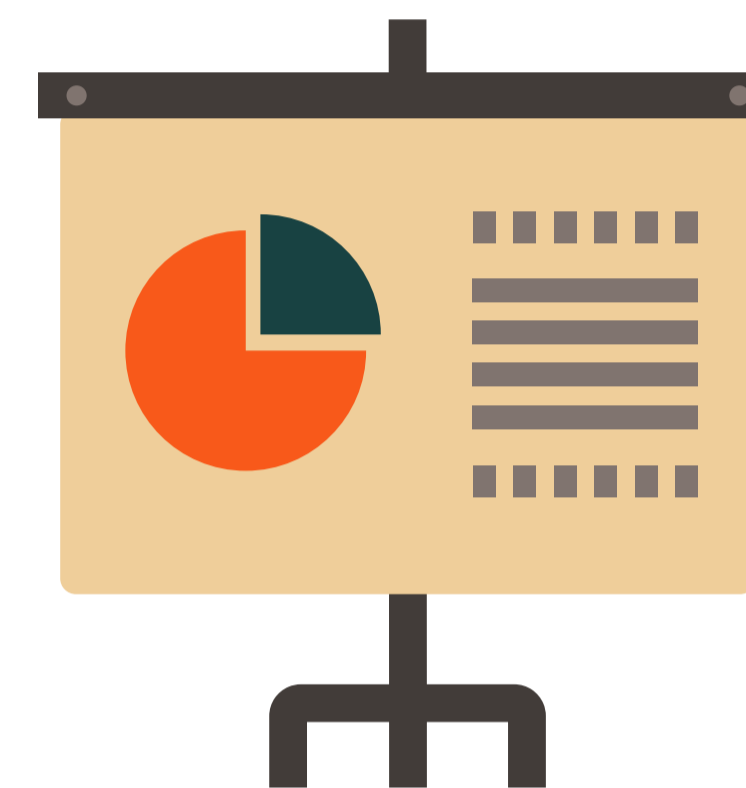

Application inventory

You cannot secure the unknown. Using Appsec360, maintain a real-time inventory of applications & services.

Know your crown jewels

Not all applications are created equal. Using Appsec360, always be aware of your core assets & their attack surface.

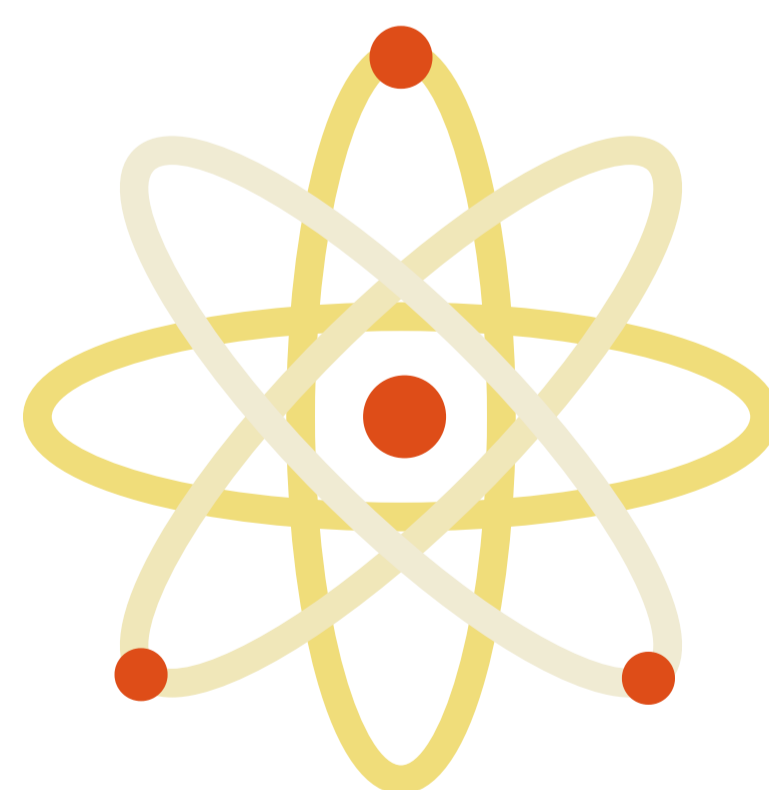

Maintain current risk profiles

Risk is not static. Appsec360 enables risk profiles with ownership hierarchy and assign owners to issues for anomalies detected.

Know your control gaps

Continuously monitor assets for vulnerabilities. Using Appsec360, get immediate visibility into gaps in your security controls.

Continuous analysis

Just knowing the gaps is not enough. Using Appsec360, define SLAs & metrics. Continually measure and track them.

Continuous compliance

Automatically enforce critical security controls based on organizational mandates.
