

A classroom scene with several students sitting at desks. In the foreground, a young boy with dark hair and a blue polo shirt is looking towards the camera. Behind him, other students are visible, some holding tablets. The background shows a classroom setting with a blue bulletin board and papers.

By IRIS

Managing every area of
school life just got easier,
wherever you are.

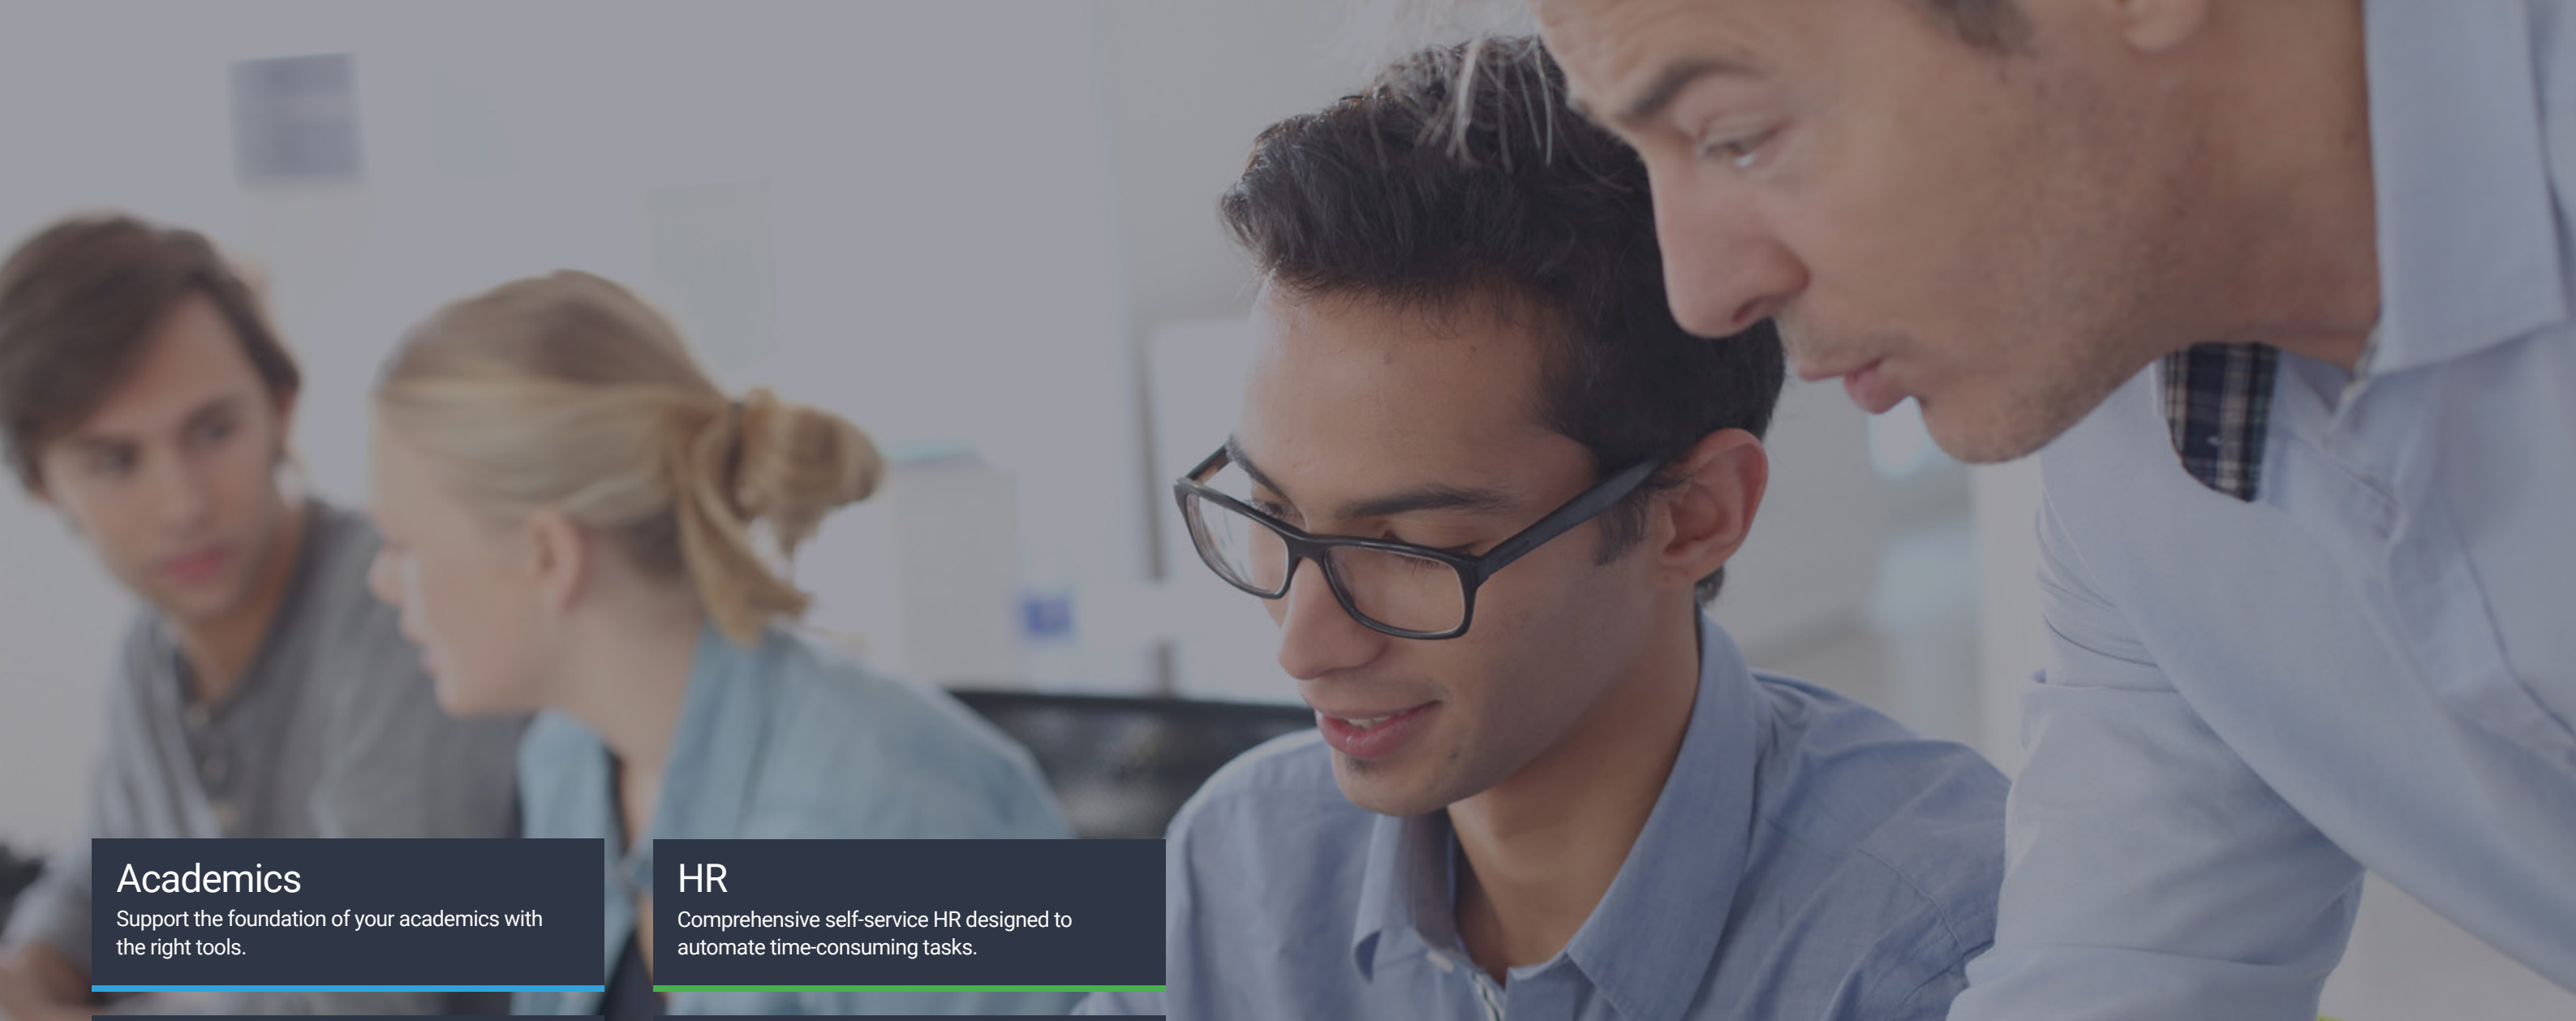

Accessible Anytime.
Available Anywhere.
Increase Efficiency.

Join our growing community...

A cloud-based, integrated management information, HR and accounting software to support schools worldwide.

Academics

Support the foundation of your academics with the right tools.

HR

Comprehensive self-service HR designed to automate time-consuming tasks.

Administration

Streamline and automate core administrative processes to save your staff members time.

Assets

Take control of your school's assets in one convenient location.

Admissions

Manage new applications with powerful, paperless processes.

Reporting

Use powerful reporting tools to gain better insights and support future planning.

Communication

Enhance communications to increase engagement across your school community.

Teaching

Give your teachers everything they need to help the school day run smoothly.

Finance

Improve the efficiency of financial planning and reporting with an integrated accounting system.

Wellbeing

Ensure every student is happy and healthy throughout their school career.

A feature rich platform for every need

Flexible. Scalable. Your school, run your way.

Support the foundation of your academics with the right tools

Academics

Calendar

Create, manage and share multiple calendars to cover every aspect of school life - academic and extracurricular.

External Exams

Manage every area of external examinations, from coursework and studying through to programming and seating plans. Plus, share results via Student Profiles and Parent and Student Portals.

Internal Exams

Manage and administer complete exam cycles simply and effectively.

Gradebooks

Record all grades, marks and test results in one centralised location to accurately track student progress and create tailored reports.

Multiple Curriculum

Support multiple curriculums for 3-18 year olds, including: IB, Edexcel, Cambridge or your local national curriculum.

Reports and Profiling

Create and compile interim and full end-of-term and annual reports for parents. Plus, student profiles provides a single destination for viewing complete student records.

Staff Cover

Maintain an oversight of staff availability and absences, solve staffing challenges, and publish changes to alert your team.

Student Tracking

Analyse students' academic performance individually or by group. Import data from multiple sources, convert test scores, and display data graphically before publishing via various channels.

Teacher Cover

Manage staff availability and absences, and solve staffing issues efficiently with cover charts, calendars, timetables and multiple communication channels.

Teacher Schedules

Organise and manage your teachers' time effectively, including the subjects they teach and the classes they run. Plus, assign students to sets or classes, plan the curriculum, and notify teachers, department heads and students.

Timetables

Organise and share every school timetable imaginable. Flexible and easy to use, with multiple import options, this module is perfect for taking charge of the entire academic year.

Multi-Divisional Timetables

Designed for schools with multiple campuses or tiers such as 3-18 schools, those who have multiple 'divisions' can create separate registration rules for each 'division' with lesson registrations filtered by division.

Streamline key administrative processes by automating lengthy tasks

Administration

Census

Pull relevant data to complete supported government censuses.

Data Protection

Obtain and record consent from parents and students, plus extract data for DSAR requests and comply with GDPR.

Document Management

Upload and maintain all your documents, including address labels, letter templates, photographs and more.

Human Resources

Take care of all your staff records, from appraisals and professional development to storing key information and documents.

Online Payments

An online payment processing platform that makes every kind of incoming payment – and refund – possible.

Student Registers

An audited way of grouping specific cohorts of students for gifted, talented, scholarship, boarding, SEN and so much more.

School Manager

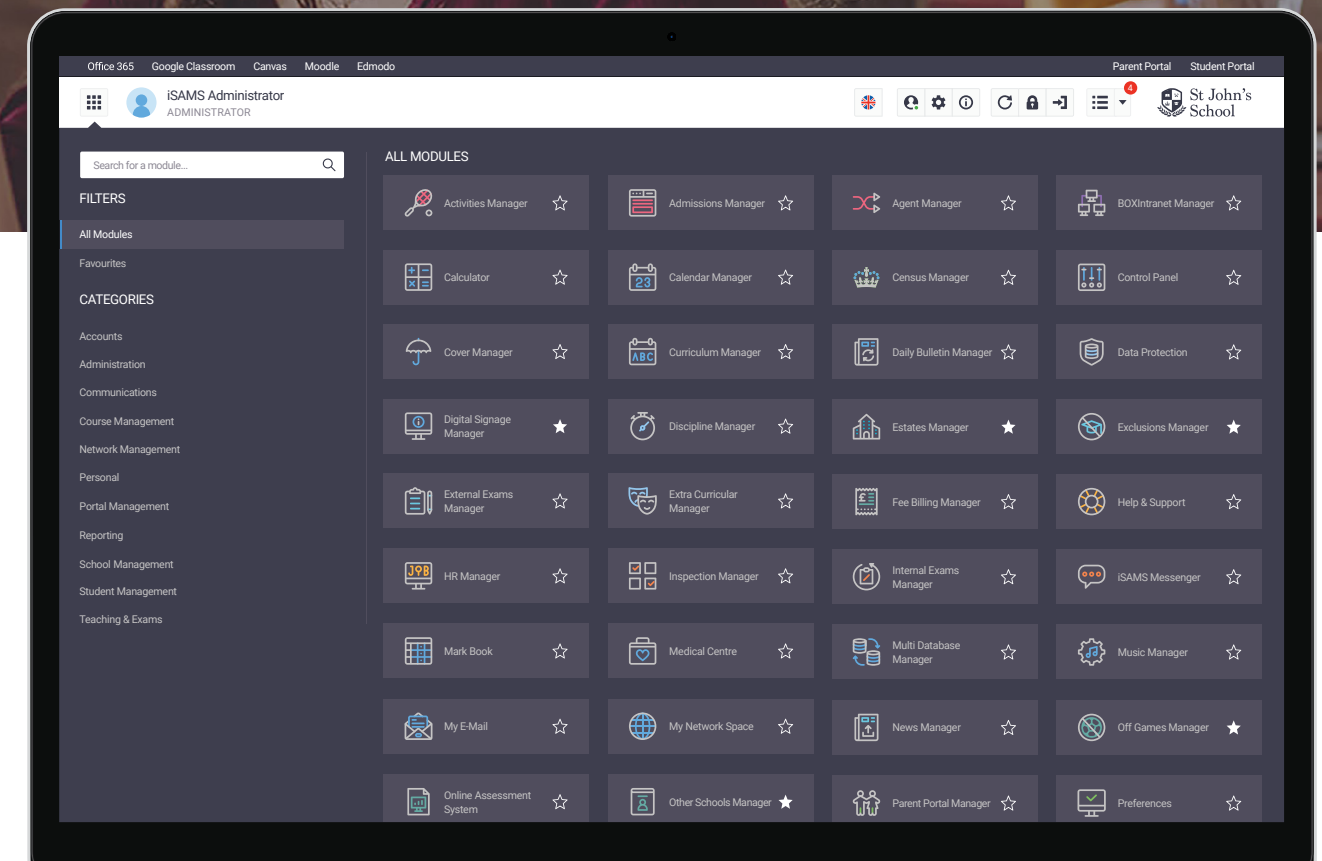

Oversee your school grouping structures to manage all classes, academic and boarding houses, year groups, and pastoral tutors.

Student Data

Manage student data including family trees, admissions, census information, discipline records, passports and visas.

School Register

Manage and audit every aspect of attendance, including alerts for teachers, students and parents.

Manage new applications with powerful, paperless processes

Admissions

Admissions

Efficiently manage every element of your school's application and admission process, and build custom reports to obtain in-depth insights.

Agencies

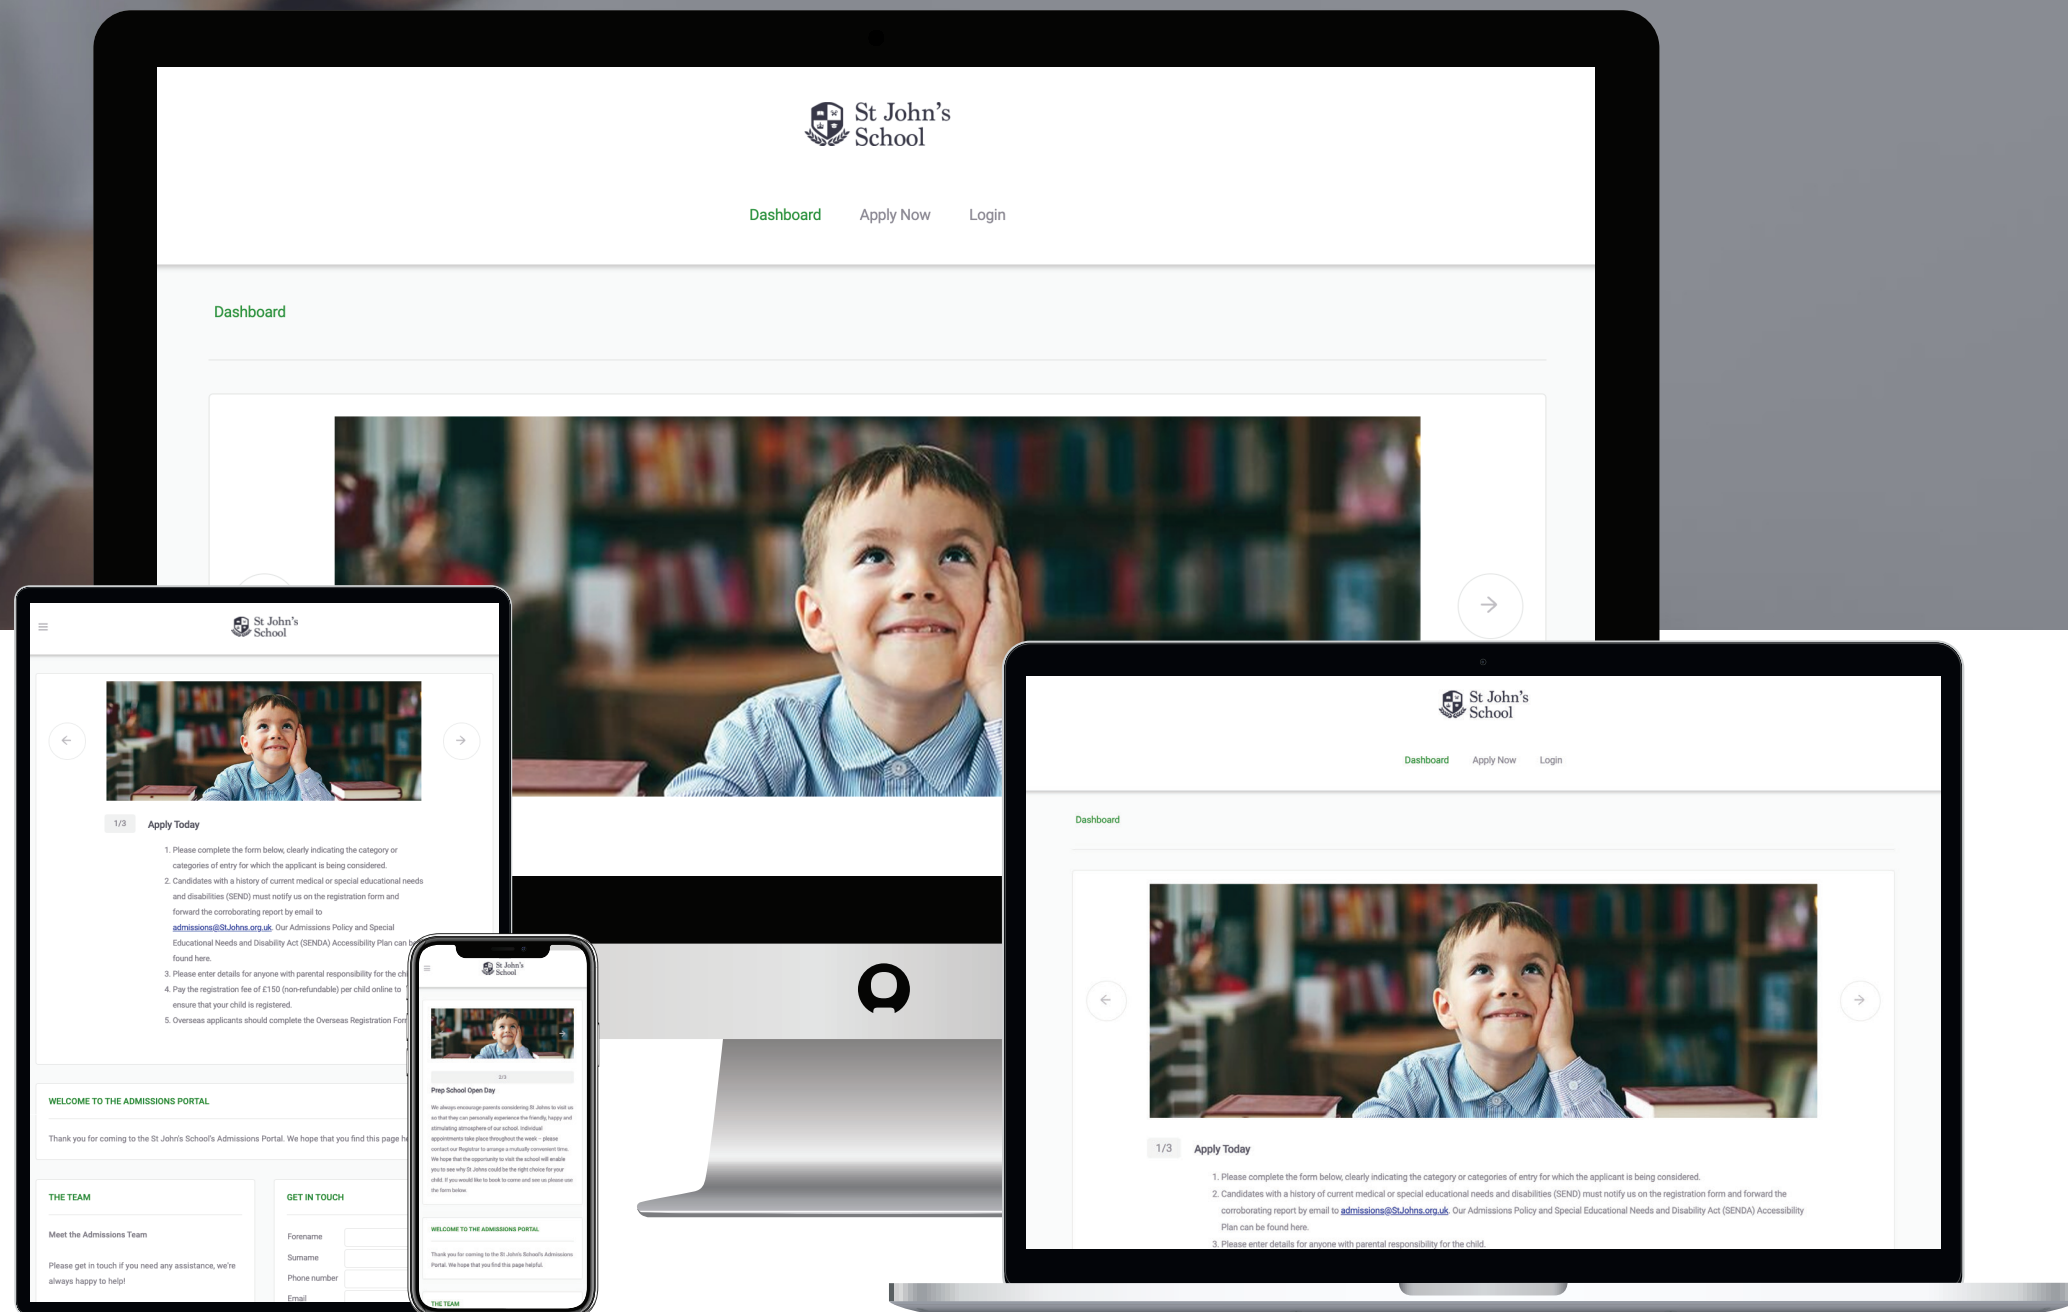

Track and link unlimited numbers of agencies, applicants, alumni and current students, as well as logging visits and recording relevant notes.

Feeder Schools

Manage feeder schools and reference requests, and store related notes and documents.

Cloud Portal

Create dedicated, branded websites for enquiries and applications. Parents can quickly request a callback, sign in to view and track the status of applications, and pay registration fees securely via the portal. Admissions staff can obtain detailed insight into user behaviour with our Google Analytics integration.

Boost communication across your school community

Communication

Calendars

Easily create, manage and share multiple calendars to cover every aspect of school life.

Daily Bulletin

Revamp your assembly and daily notice sheets, creating paperless bulletin entries with a start and end date, category and title.

iStudent App

Empower students to take charge of their learning wherever they are, via their mobile devices.

iParent App

Enhance parental engagement by sending key school news and updates directly to their mobile devices.

News Alerts

Create professional-looking news articles and publish them across a variety of channels.

Parent Portal

Give parents real-time insights into their children's education through this secure online space.

SMS Gateway

Schedule, personalise and fully manage all SMS communications, including emergency broadcasts and more.

Student Portal

Make it even easier for students to access key information, including their timetables, extra-curricular activities, school reports, and self-appraisals.

An integrated accounting system to efficiently manage your accounts and budgets

Finance

Accounting

Improve accounting, consolidation and business intelligence with predefined and custom reports, and auto-bank reconciliation.

Expenses

Record expenses and outlay against internal or external projects and managers to approve, add receipts and submit to line managers.

Stock

Integrate with iPOS, shopping cart, CRM systems and more to automatically track stock levels.

Fee Billing

Generate bills and add charges in several different ways for specific applicants, current students and alumni.

Fixed Assets

Manage and store all school and group assets via this single database, without switching between multiple systems.

Online Payments

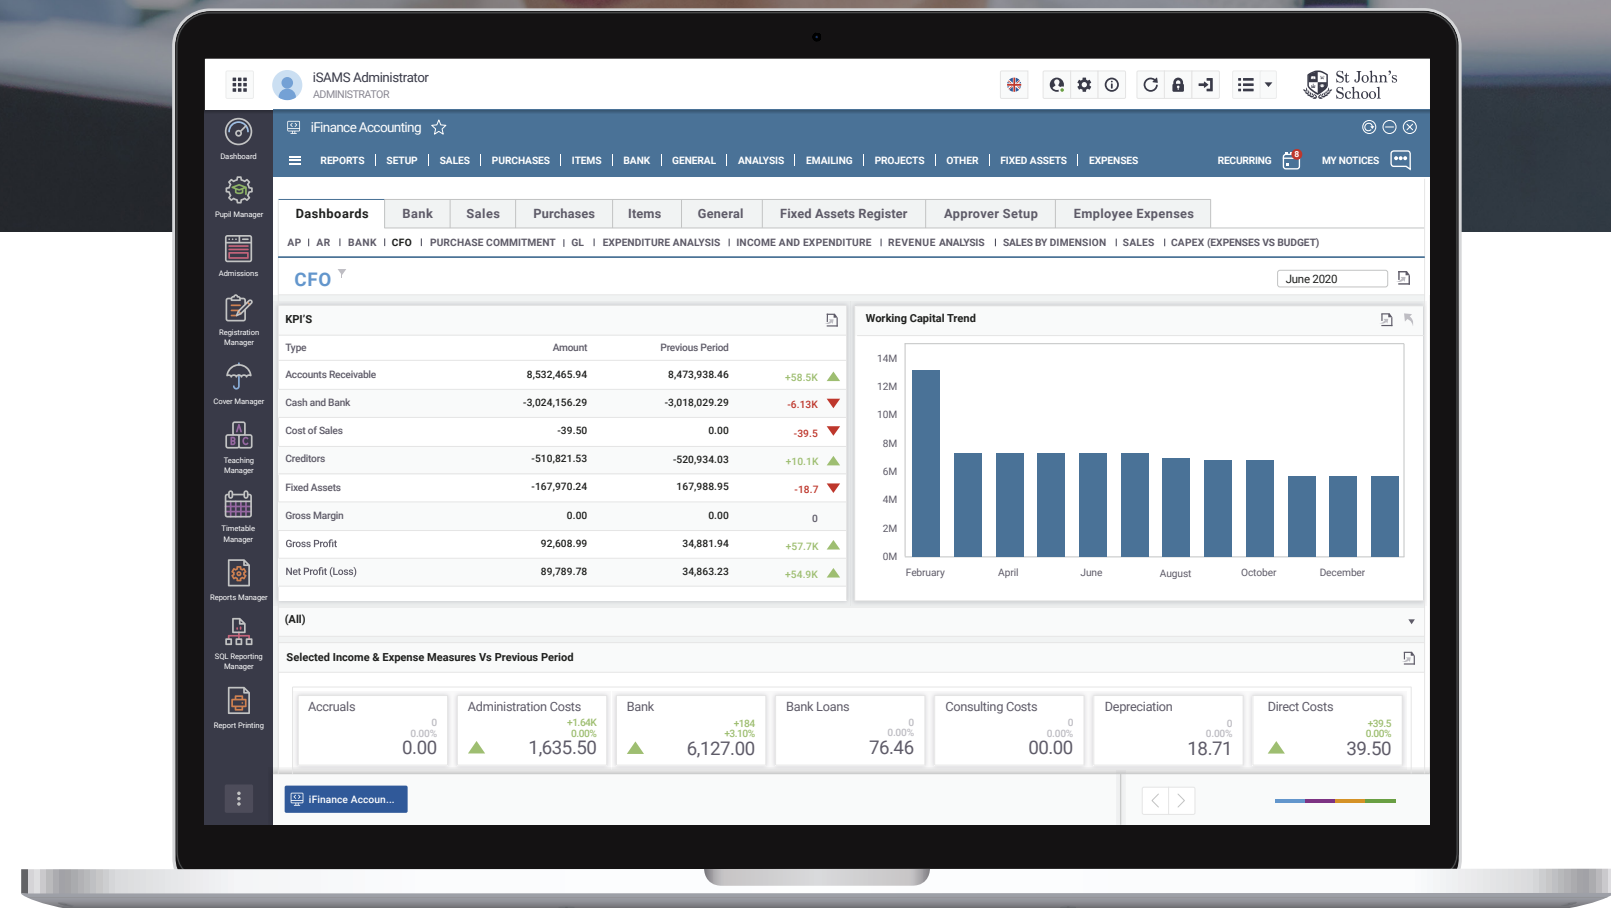

A payment gateway for secure, convenient way for parents to pay school fees online.

Workflow Approval

Automatically send paperless POs and purchase invoices, adding customisable layers of approval and generating an auto-approval process.

AP Inbox

Go paperless and speed up your incoming invoice processing with the iFinance automated AP Inbox, featuring currency recognition, supplier identification and invoice auto-creation.

Comprehensive self-service HR designed to automate time-consuming tasks.

HR

Expedite Communication

Send important messages and requests to dashboards or by email. You can set tasks, reminders, and alerts, or add important messages to pop up at log-in, including notifications for expense deadlines or new training courses.

Secure Storage

Guarantee compliance with GDPR and other personal and professional data requirements with secure cloud-based storage. Databases are updated in real-time and accessible by authorised staff members, prioritising security and flexibility.

Dedicated Compliance Management

With secure data storage and a modular and integrated configuration, our compliance solution ensures schools can efficiently compile data and thoroughly analyse key points for improved processes. From managing risks to ensuring all staff have undergone the necessary training for their role, the solution handles the extensive nature of compliance in education.

Self-Service Dashboard

Put teachers in charge of their personal information and streamline repetitive tasks. Staff can view key employment information, including terms and benefits, school documents, payslips, or manage holiday and sick leave requests.

Compliant, Secure Storage

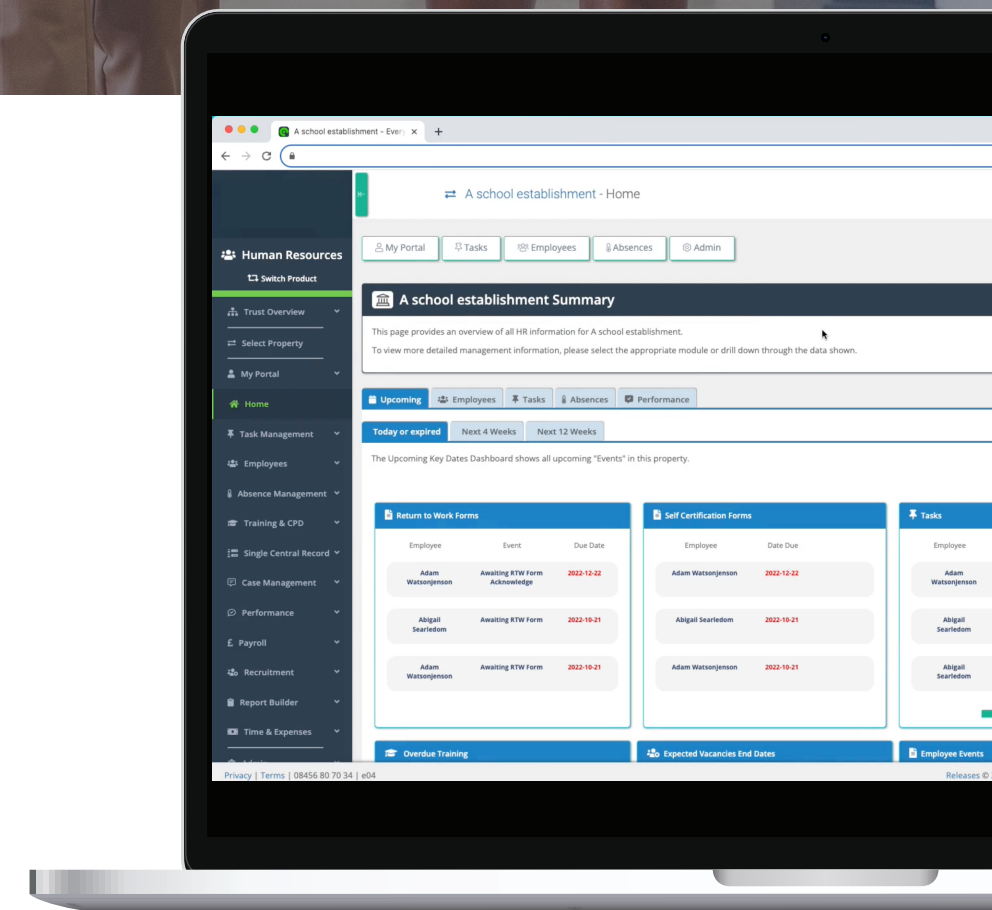

Guarantee compliance with GDPR and other personal and professional data requirements with secure cloud-based storage that's updated in real-time and accessible by authorised staff members from anywhere, through any device.

Immediate Insights

Real-time, user-friendly visualisations of everything from staff demographics to attendance levels, calendar overviews, staffing levels, and more. Plus, you can set up automated notifications for any new developments and tasks, as needed.

Rapid Reports

Access a library of pre-built reports for any area of the software. Schedule repeat reports according to your chosen intervals, including building and scheduling custom reports on demand. Benefit from effortless analysis of every area of staff employment, including a full audit trail of every staff member on your payroll..

Take control of your school's assets in one convenient location

Assets

Cloud-based asset management

Centrally manage and track your school's assets and statutory compliance across single or multiple locations, and access this data from anywhere and on any device.

Tag physical assets

Add detailed information to every asset, including a description, location, photos or videos, receipts, data sheets and more. Utilise flexible data fields to record the information you need.

Certainty of safety

Capture and store essential safety asset data, from fire extinguisher expiry dates to building condition surveys and MOTs for school vehicles.

Inspections and surveys

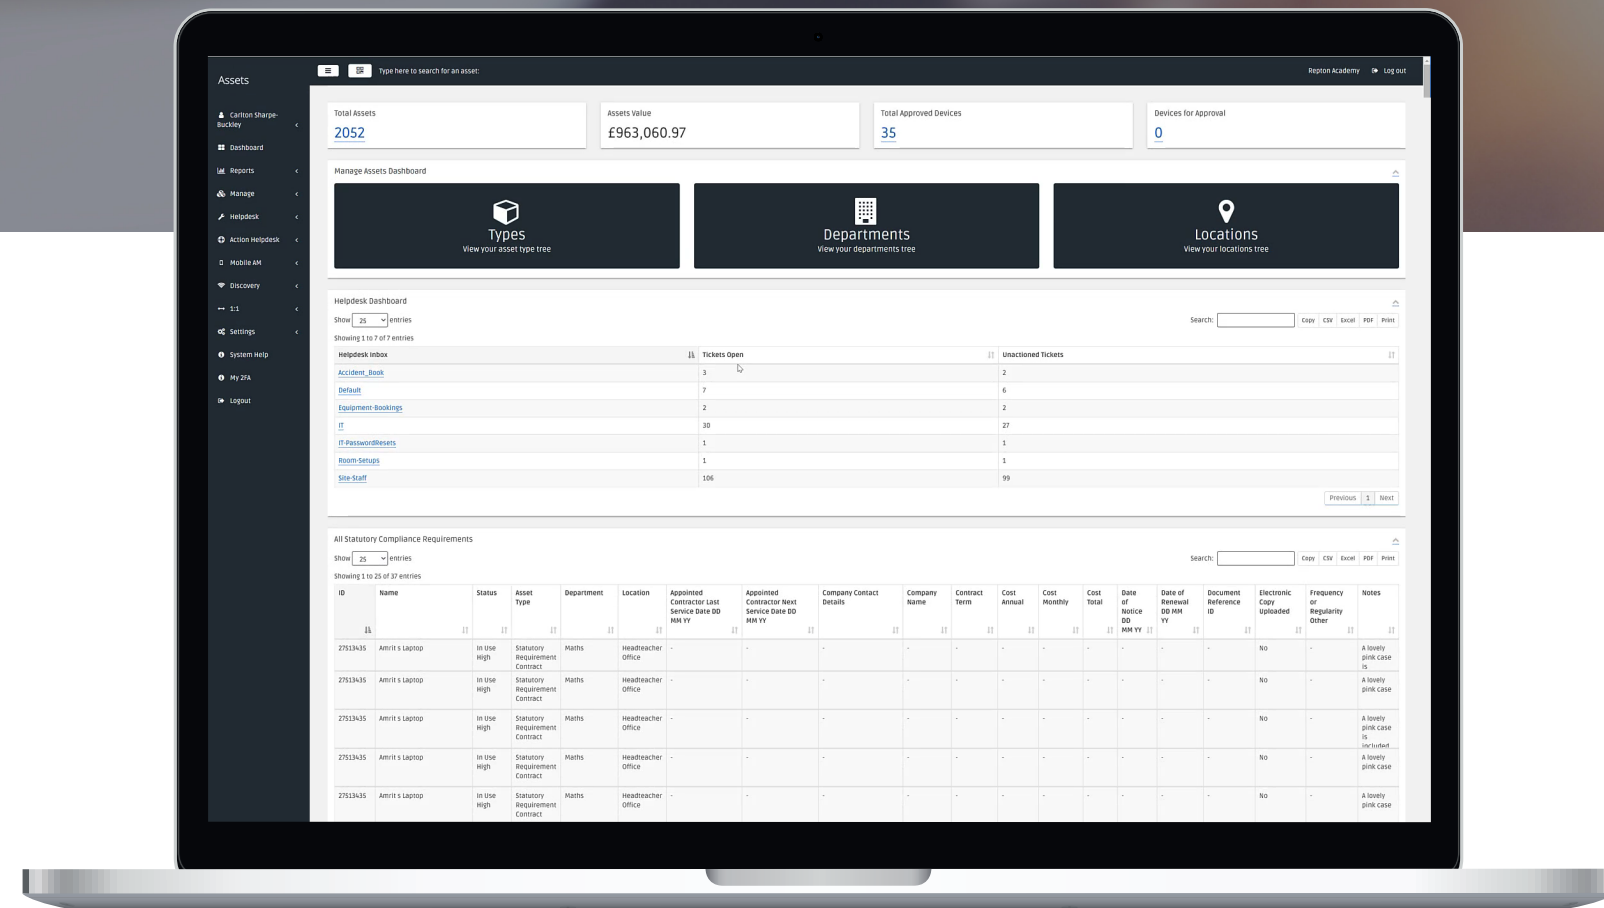

Schedule all necessary inspections and surveys, save estimates, manage costs, store certifications, and set up renewal alerts. Plan and manage all your third-party supplier contracts in one place.

Total IT management

Keep track of tablets, laptops, monitors and other devices with scannable tags. Register them to a room or year group or assign them to students or teachers on loan. Manage your software by setting reminders for updates, renewal dates and more.

On-demand reporting

Continuous data synchronisation ensures any report you run provides the very latest data. Schedule monthly or annual reports to run automatically and drill down for deeper asset analysis.

Use powerful reporting tools to gain better insights

Reporting

Assessments

Show all school reports and assessment data broken down by reporting cycle.

Academic Reporting

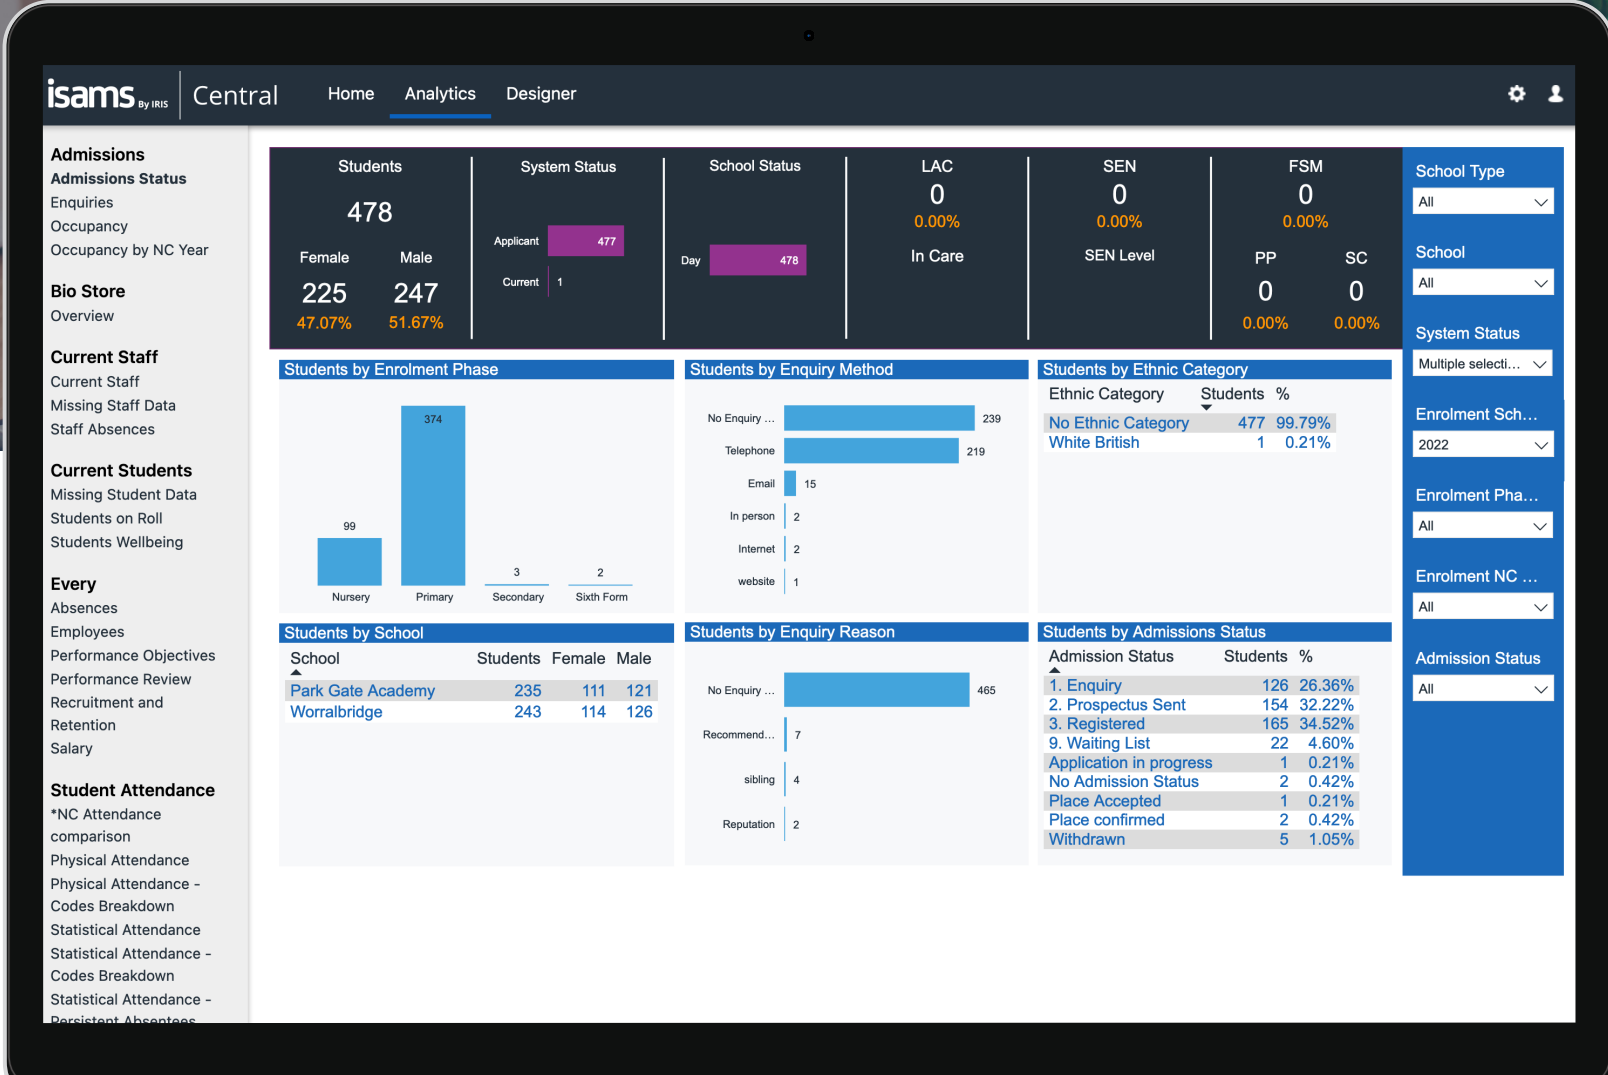

Generate school reports, build custom report outputs for students and parents, and view assessment data by reporting cycle.

Reporting with Central

Consolidate real-time data across iSAMS solutions and understand school performance thanks to Power BI technology. Enable smarter decision-making for your school.

iReport App

View and set the status of reports, see past reports and write new reports for each student.

Give your teachers everything they need to help the school day run smoothly

Teaching

Gradebooks

Record all grades, marks and test results in one centralised location to accurately track student progress and create tailored reports.

iTeacher App

Give teachers access to key school information on the move, including student profiles, timetables, cover availability and registration details via their mobile device.

iReport App

Write and submit grades, assessments and school reports wherever you are - on school trips, in the classroom and on the move.

Registrations/Attendance

Mark students as present or absent and store information such as lateness, reason for absence, or attendance outside of the traditional registration times.

Report Writing

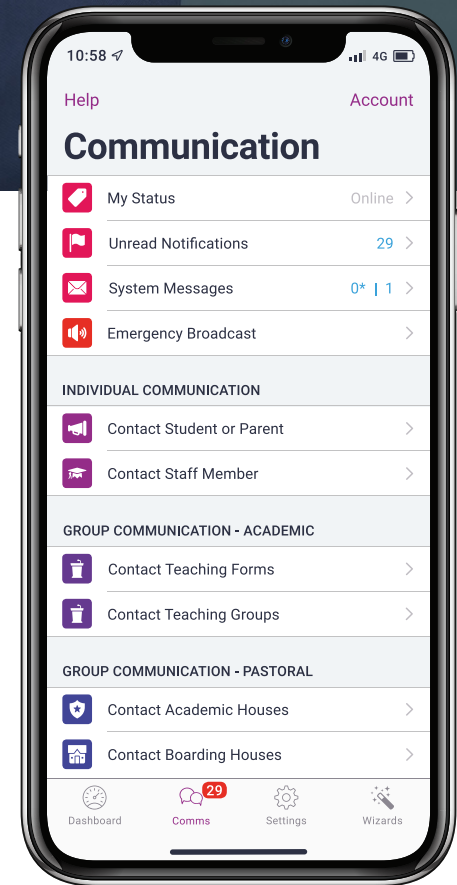

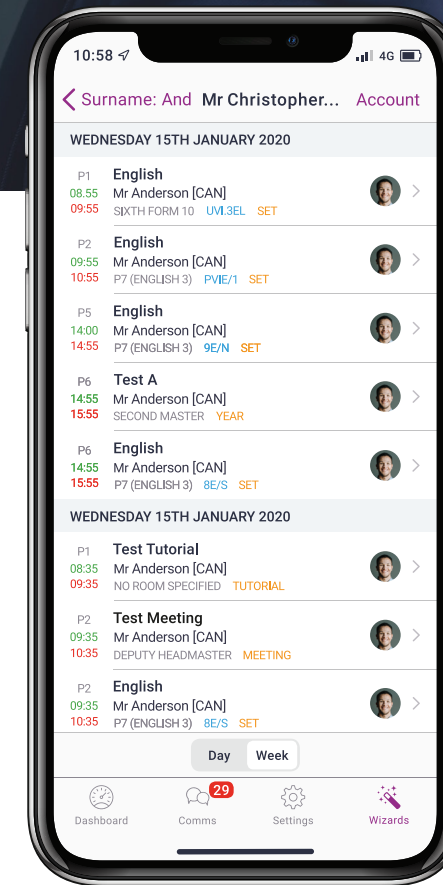

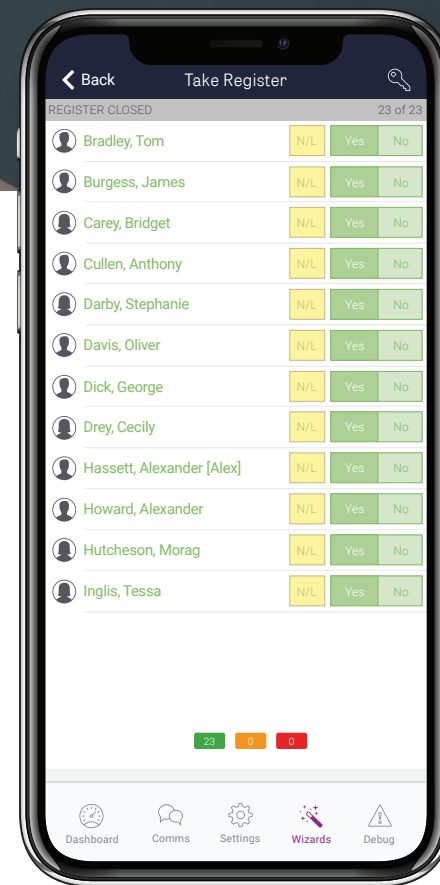

Create and compile interim and full end-of-term and yearly reports, in addition to bespoke school reports.

SMS Gateway

Send SMS messages directly from the iTeacher App to all staff, students and parents – or specified groups – as required.

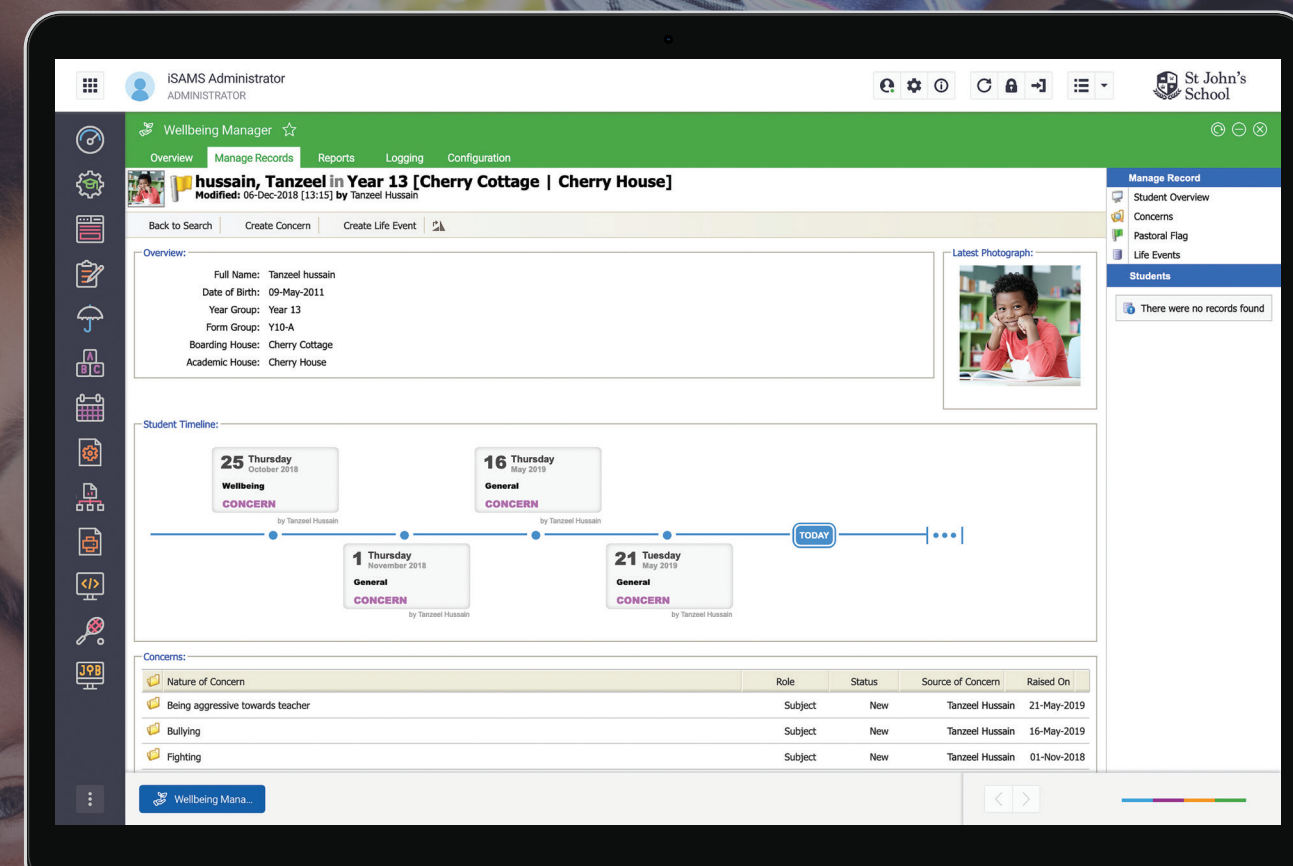

Student Manager

Access student names, contacts, and school information including health alerts, SEN details, family trees, and contact cards, as well as nationality flags.

Ensure every student is happy and healthy throughout their school career

Wellbeing

Activities

Track every student's extra-curricular activities, from Duke of Edinburgh awards and sports to drama and social clubs.

Discipline

Organise every aspect of detentions, including attendance, notifying relevant teachers, record-keeping, and updating the Parent and Student Portals.

Exclusions

Maintain accurate and up-to-date records of excluded students using government standard codes, and document meetings, outcomes and appeal hearings.

Medical Centre

Manage stock and medical records, and maintain a full inventory, with this advanced health centre for all students and staff members.

Off Games

Maintain your school's register of students not attending games, including notes and reasons for absence, variable date ranges, and more.

Reward & Conduct

Manage every area of positive and negative student conduct, with email notifications to inform chosen individuals and the ability to publish information to Parent and Student Portals.

Student Registers

An audited way of grouping specific cohorts of students, create lists for gifted, talented, SEN and so much more.

Student Profiles

View every detail of an individual student's school career via complete student records.

Student Wellbeing

View and log any wellbeing of child safeguarding concern, record onward actions and monitor their status - all whilst using the staff notifications features to ensure identified personnel are aware and kept updated. Automated notifications sent to relevant staff members for behaviour triggers.

Why iSAMS?

Sophisticated Software

Greater accessibility

Hosted in the cloud iSAMS is accessible anywhere.

Long-lasting solutions

A modular architecture to build your own system and grow with it.

Make it your own

Add your own branding to the customisable front-end.

Easy to use system

Feel the benefits of intuitive system navigation.

Protect your data

With advanced security technology, your data and assets remain secure.

Innovative technology

Developed with the latest, most reliable server and client-side technology.

Full Support Service

Updates, Upgrades and Maintenance

Enjoy regular system enhancements, with bi-weekly updates scheduled at times of minimal use.

Support

Reach our dedicated Support team with live support across multiple time zones and Service Centres in the UK and Australia.

iCommunity Site

Access all product, company and community news through this online forum, where you can also connect with peers to share new knowledge and ideas.

Reporting Services

Our Reporting Services team are experts in extracting data from your system and presenting it in easy-to-read formats, helping you with all your reporting needs.

Marketplace

Find best-of-breed software solutions at the iSAMS Marketplace, to integrate disparate systems and streamline key school processes.

Hosting

Take advantage of our hosted server, providing excellent speed, performance and security.

Customer Account Managers

Maximise your use of iSAMS to meet your school's needs, with advice from your dedicated Customer Account Manager.

iUniversity

Become an iSAMS expert with over 70 in-depth courses accessible on our dedicated e-learning platform, including free courses for teachers. Learn at your own pace, anytime, anywhere.

Innovative Technology

Secure cloud hosting

Fully managed, secure hosting in the cloud.

Comprehensive reporting

With enterprise tier reporting and full access to your database, we offer a complete Business Intelligence platform.

Simple SaaS Pricing

Pricing to suit your school, with no upfront costs and prices calculated by student numbers.

Single web-based architecture

A single database solution accessed through one intuitive interface.

Powerful Integrations

Approved Integrators

Explore our extensive range of approved integrators, giving you access to best-of-breed third-party software that syncs seamlessly with your MIS.

Batch API

Extract data from the iSAMS system in a standardised format through our Batch API, without having to query the database directly.

Comprehensive set of APIs

Our APIs allow for a seamless integration with third-party software using industry standard API technology, so they can take full advantage of well-known protocols.

Developer Portal

Access our comprehensive development toolkit and related literature through our Dedicated Developer Portal.

In-house School Development

If you develop your own apps and software, have the option to plug them into the iSAMS MIS.

Rest API

Access data in real-time to perform data reads and writes, and easily integrate data into the iSAMS system using the same business logic that our system does.

Single Sign-on (SSO)

Offer users a single sign-on option to enjoy a seamless experience across multiple domains.

Supported Integrations

Use our wide range of integration services including, but not limited to: Office 365, Google Classroom, Canvas, Moodle, Edmodo, Active Directory, Microsoft SIS Sync and ManageBac.

Satisfied schools

1,500+ schools and counting have made the switch to iSAMS

"The big problem that iSAMS solves for us is the fact that its cloud based. The fact that everything is accessible through the cloud and that it will integrate properly with a lot of our other products really will solve a lot of those headaches that we encountered."

Anna Millar – Director of ICT at Edinburgh Academy

Edinburgh Academy, Edinburgh, UK

"Our school was looking for a student information system which could integrate well with other systems and provide the level of customisability we were looking for, iSAMS was the only one which gave us this!"

Jacob Martin – Director of Teaching & Learning

International School of Zug and Luzern, Baar, Switzerland

"The support team is quick to respond to queries and we now benefit from extended links via the iSAMS community. The on-site training offered in school is fantastic, providing bespoke development and support for a small group of users at good value for money."

Louise Orton – Deputy Head, Teaching & Learning

Sherborne Girls, Dorset, England

"Since moving to iSAMS the day-to-day management of our school data has improved significantly, increasing efficiency across the school."

Mark Smith – Technical Services Manager

Cheadle Hulme School, Greater Manchester, England

"I would recommend it highly for independent and international schools. I can't think of an MIS system that would do a better job. Everything we want to do we can do with iSAMS, and we can now provide a better education for our pupils."

Richard Marchant – Principal

New English School Kuwait, Jabriya, Kuwait

"iSAMS fulfilled all our criteria and we liked how we could add modules as required over time or tap into other systems on the Marketplace to add even more depth of functionality. It was hard to say no to iSAMS becoming our school's new management information system."

Sheila Stamp – Director of IT and Communications

Discovery Bay, Hong Kong

"What do we like most about iSAMS? It's intuitive, it's user-friendly. It does the core things extremely well."

Chris Jones, Deputy Head of Senior School

British School of Manila, Philippines

2005

iSAMS officially launches, offering the first web-based MIS on the market, and welcoming Rugby School and Warwick School

2008

iSAMS receives growing interest from some well-known schools and we welcome our first Prep School

2009

iSAMS goes global and we welcome our first school international schools

2011

We welcome our 100th client

2014

We welcome our 300th school, including our first Grammar School

2015

We launch our suite of multi-lingual Mobile Apps, compatible on iOS and Android

2016

We are recognised as the leading MIS supplier to Independent Schools, and we introduce the iSAMS Marketplace

2017

Over 850 schools, academies and MATs have chosen iSAMS as their trusted MIS partner

2018

We launched our Wellbeing Manager and Data Protection modules, plus our fully integrated, online accounting solution - iFinance

2019

Even more intuitive than before, our improved user interface and secure single sign-on MIS now supports 950+ schools in over 75 countries

2020

iSAMS joins the IRIS Software Group and we're proud to welcome our 1,000th school to our growing community, which now spans more than 80 countries.

2022

We welcomed our 1,300th school and launched iUniversity, an on-demand learning platform, plus a payment gateway designed for schools.

2023

Introduced Central, powered by PowerBI, and now supporting 1,500+ schools globally with 1.4 million student profiles.
