

is embracing **Open Source** through the Open Compute Project® A global leader in powering, managing, and securing the world's digitally connected infrastructure.

AMI is committed to contributing to the open source community with the goal to encourage

How AMI will access customers

on the OCP Marketplace

By giving innovative features

back to the community

ODMs are shipping

OCP platforms that

are sold on the

OEM

Partners

AMI is working with:

make contributions to OCP

Si Vendor **CSP Partners Partners Partners**

Source trees based on The Linux Foundation®

OpenBMC™ and TianoCore EDK II will be fully

class engineer-to-engineer support and will

managed and maintained by AMI with its world

Customers wanting a more

feature-rich solution can

easily license the cutting

edge tree and pay AMI for

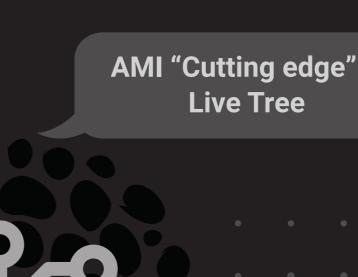

support, additional

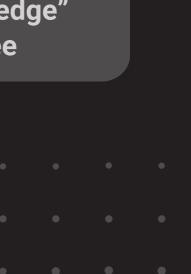

Open Compute Project®

features and customizations

ODM

CSPs, DCs,

AMI's open-source trees are pulled

from The Linux Foundation® OpenBMC™ and EDK II

trees and AMI develops additional

value-add features on top of them

Point-of-use customers can

then utilize this hardened

open-source tree for their

OCP server platforms

and

Enterprises
