## Why Clients Partner with Us

Our 98% customer retention demonstrates our commitment to developing long term partnerships with our customers. Our customers trust us to provide honest, unbiased information, take a common-sense approach to system design, deliver reliable services and solutions, and stand behind our work by providing an outstanding level of customer support.

## What Our Customers Have to Say

"I would just like to thank you for your assistance. It was far from an ideal situation, and there were more obstacles than normal, but your crew still got the job done. This helped put us in a much better position for our annual shutdown."

— EARL SALISBURY, Veolia

"NeoMatrix does it right! Not only do they complete work on-time and within budget. They also provide excellent project documentation."

— JIM MAJSK, Groom Energy  
(part of Dalkia Solutions)

"Once again the team from NeoMatrix came through! The knowledge and support allowed us to complete a major Divisional Goal of upgrading our Ignition License to 8.1. We were able to get all 55 projects including some that run on 32-bit systems up and running. Certainly a hardworking and innovative team."

— EILEEN SOULIOTIS, Entegris

"We now have final approved versions of the CMS Canton Documents to move us forward. Thank you to all on the team who helped get us here. This was a major goal for the team. We have saved copies on the Facilities Engineering shared drive in the CMS Capital project folder. A special thanks to NeoMatrix for the input generation and support with us, especially on the CS."

— MARIO MAURICIO, Facilities Engineering  
and Controls Manager, Organogenesis
